

Liene Pix Cut 2-in-1 Portable Photo Printer

Model: PR001-65002

Manufacturer: LIENE

EAN: 6971398602111

Product Code: 882063

R7,262

Liene Pix Cut 2-in-1 Photo Printer

The Liene PixCut S1 photo printer is a compact creative hub that prints, laminates, and precisely cuts photos and stickers in a single, fully automated cycle. Vibrant colors, sharp details, and an elegant finish give every photo and graphic design a unique character. Thanks to its well-thought-out design (281 x 196 x 104.5 mm), the device replaces several separate pieces of equipment, making it the ideal solution for those who value functionality and space-saving in their studio.

Printing, laminating, and cutting in a single cycle

The device operates on an All-in-One basis, meaning it prints a photo, applies a protective layer, and precisely cuts it all in a single cycle. Thanks to the use of four-layer technology incorporating CMY colors and lamination, the finished photos and stickers are waterproof, as well as resistant to fading and scratches. This allows them to retain their aesthetic appearance for a long time. The entire process starts with a single click in the app, and in just a moment you can peel off the finished

sticker and place it wherever you want. A special backing makes peeling easy and leaves no adhesive residue, allowing you to reposition the sticker if needed.

Precise cutting with AI technology

The built-in cutting system, featuring a 45° blade with a 1.0 mm diameter, ensures accurate reproduction of even the most complex shapes. The AI Auto-Cutting feature automatically recognizes the image contours and sets the cutting line without the need for manual adjustment. Additionally, auto-calibration ensures precision, and the blade's durability—estimated at over 800 cuts—allows for long-term use without compromising performance. This solution significantly reduces the time needed to create your own labels or stickers.

Your memories in the highest quality

A resolution of 300 x 300 DPI, combined with a 1280-dot thermal print head, delivers sharp details and smooth tonal transitions. D2T2 dye-sublimation technology ensures even color application, making photos look natural and realistic. Support for JPEG, PNG, and HEIC files allows for convenient photo printing without the need for prior conversion.

Your mobile design studio in one app

The printer connects wirelessly via Bluetooth 5.0 and allows simultaneous connection to up to 3 devices. It is compatible with iOS 9.0 and later, as well as Android 4.0 and later. The Liene Photo app offers a rich library of free templates, elements, and frames, a feature for creating puzzles, photos for documents, meme stickers, and holiday designs, as well as AI matting for background removal. The available job queue makes it easy to organize your work, and the intuitive interface lets you quickly go from design to finished sticker.

Convenience for everyday printing

The DHP700 supports two popular paper sizes: 4 x 6 inches for photos and 4 x 7 inches for stickers, allowing you to create both classic photos and larger, eye-catching decorative projects. A high-capacity 36-sheet cassette allows for multiple prints without frequent material changes, streamlining work and enhancing user comfort. The device's design is optimized for stable operation in typical

home environments, ensuring reliable performance during daily printing and cutting.

Included

- printer with plotter
- ink cartridge (36 sheets)
- 4x7" adhesive paper (white, 18 sheets)
- 4x6" photo paper (18 sheets)
- AC adapter
- user manual

Manufacturer	Liene
Model	DHP700
Printing technology	D2T2 thermal sublimation (CMY + protective layer)
Resolution	300 x 300 DPI
Print speed	approx. 59 sec/sheet
Print head	1280-dot thermal
Cutting system	Premium Fine-Point Blade, 45°, 1.0 mm
Dimensions	281 x 196 x 104.5 mm
Weight	2.9 kg
Compatible systems	iOS 9.0 and later, Android 4.0 and later
App	Liene Photo
Paper size	4 x 7 inches (101.6 x 177.8 mm); 4 x 6 inches (101.6 x 152.4 mm)
Supported file formats	JPEG, PNG, HEIC
Tray capacity	36 sheets
Rated input voltage	24 V-1.6 A
Operating temperature	10–35°C
Wireless connectivity	Bluetooth 5.0
Multi-connect	3 devices simultaneously
