IsEasy LT5-02 ceramic/electric cooktop

The IsEasy LT5-02 electric cooktop is an advanced built-in appliance that combines high performance with an elegant design. Equipped with 5 heating zones with different wattages (from 1200W to 2400W) - it offers versatile cooking options. A touch control panel with 9 power levels and a timer for up to 99 minutes gives you full control over the cooking process.

Five cooking zones with different power levels

The LT5-02 is distinguished by a thoughtful configuration of five cooking zones to suit a variety of cooking needs. The main zone of 2400 W (800 W+800 W+800 W) is ideal for intensive cooking of large portions. There are also two 1200 W zones, one 1800 W and one 2000 W zone (1100 W + 900 W). So you can comfortably prepare dinner for the whole family or guests!

Advanced touch control system

The intuitive touch panel allows you to precisely adjust the temperature by sliding your finger along the slider. With 9 power levels, you can adjust the heating intensity for any type of food - from gentle heating to intense frying.

Timer and safety features

A built-in timer for up to 99 minutes and an automatic shut-off ensure comfort and safety when cooking. This system is ideal for long processes, eliminating the risk of burning food. The stove also has a built-in residual heat indicator. In addition, the Child Lock function prevents children from accidentally turning on the hob.

Fits different types of cookware

The hob is compatible with all types of cookware - from steel pots, ceramic and enamel cookware to cast iron pans and copper saucepans. This versatility means you don't have to replace your existing kitchen equipment.

Easy to clean and maintain

The smooth glass surface allows you to clean the cooktop quickly and efficiently. The material is scratch and heat resistant, and any dirt can be easily removed with standard cleaning products.

Quiet operation and efficient cooling

An advanced ventilation system ensures optimal heat dissipation with minimal noise. Efficient cooling prolongs the life of the appliance and allows the temperature to be quickly reduced after cooking, increasing user safety.

Elegant built-in design

The hob was designed with modern kitchens in mind. Its minimalist design with a black surface blends perfectly with a variety of interior styles. The compact dimensions of 77 x 52 x 5.1 allow for easy installation in standard kitchen countertops (the hob fits into recesses of 49 x 74 cm).
