Minix SF10T 10.5" Portable Monitor

Whether you're working remotely, traveling for business, giving presentations, or simply need an extra screen, the Minix SF10T provides a convenient workspace whenever you need it. Its compact design, touchscreen, high-quality image, and seamless USB-C connectivity make this monitor ideal for both professional use and everyday entertainment. It's a practical tool for people who don't want to compromise on comfort when working outside the office.

Ultra-lightweight design built for mobility

The SF10T was designed with maximum convenience in mind for use on the go. The 10.5-inch screen is housed in a compact chassis measuring just 232.9 × 163.9 mm, and the entire unit weighs only 363 g. This means the monitor fits easily into a bag, backpack, or even a larger pocket. Its compact size allows you to comfortably use the additional display even in confined spaces, such as while working on a train, plane, or in a cramped office.

Clear Full HD IPS Image

A resolution of 1920 × 1280 pixels combined with an IPS panel ensures a sharp image, rich colors, and high readability of displayed content. Wide viewing angles of 178° guarantee consistent image quality regardless of where you're looking at the screen from. This makes the SF10T ideal for presentations, creative work, team collaboration, and watching movies and other multimedia content.

Intuitive operation thanks to the multi-touch screen

The monitor features a capacitive screen that supports 10 simultaneous touch points. The responsive panel allows you to comfortably scroll through documents, zoom in on photos, manage applications, or create sketches without the need for additional control devices. Natural gesture control makes everyday work faster, more comfortable, and more intuitive than ever before.

One cable, maximum convenience

Two fully functional USB-C ports significantly simplify workspace organization. The monitor supports Power Delivery input up to 65 W and output up to 47 W, enabling simultaneous data transfer and charging of compatible devices. This single-cable solution reduces the number of cables and adapters, ensuring greater organization and convenience for both desktop and mobile work.

Sound and flexibility tailored to your needs

Two built-in stereo speakers deliver clear and balanced sound during online meetings, presentations, and multimedia playback. The 8Ω, 1W speakers enhance the monitor's functionality, allowing you to use it without connecting additional audio equipment. Meanwhile, VESA compatibility with dual 75 mm holes and the included magnetic stand allow you to easily adjust the mounting method to your individual preferences. The monitor can be placed on a desk, mounted on an arm or wall, and the stand's adjustable tilt angle helps maintain high comfort while working.

Caring for your eyes

HDR technology improves image contrast and depth, making displayed content look more natural and realistic. An additional benefit is the low blue light screen, which helps reduce eye strain during long hours of work. This feature will be particularly appreciated by those who spend many hours in front of the monitor and expect high comfort regardless of their work environment.

Included

- portable monitor
- magnetic mount
- HDMI to mini HDMI cable
- USB-C to USB-C video cable
- USB-C to USB-C power cable
- Micro USB to USB-A cable
- 20 V 1.5 A power adapter
- adapter plug
- user manual
