Take your racing simulation to the next level with the PXN-V10 Ultra set, which combines direct drive power, realistic pedals and ergonomic steering wheel design. With 3.2 Nm of torque, precise Hall-Effect sensors and an intelligent cooling system, you get smooth, stable and long-lasting gameplay - without compromise. Compatibility with PC, Xbox One, Xbox Series X/S and PS4 means you can enjoy realistic driving in your favorite titles across multiple platforms.

## **Realistic Direct Drive Power**

The servo motor with 3.2 Nm of torque will bring every driving detail right into your hands. You'll feel every turn, slip or contact with the road surface, enjoying full immersion and gaining an edge on the track.

## **Stability in all conditions**

Thanks to Intelligent Temperature Control 2.0 technology, the kit monitors temperature in real time, ensuring performance even during hours of racing. This is confirmed by long-distance tests - after 48 hours of operation, the temperature does not exceed 50°C, while older designs can reach up to 80°C. So you don't have to worry about overheating - you will always maintain maximum power.

## **Premium steering wheel**

The detachable 270mm D-shaped steering wheel is upholstered in high-quality leather for comfort and a stable grip. It features 17 programmable buttons and F1 formula-style paddles, giving you full control over every maneuver. The use of an aerospace-grade slip ring has resulted in durable and reliable signal transmission even during intense use.

## **Precision pedals**

The set of brake and accelerator pedals uses Hall sensor technology, providing linear, extremely accurate control. In addition, the ability to adjust the angle and height of the panel allows you to tailor the set to your preferences and ergonomics of your workstation.

## **Unparalleled compatibility**

The PXN-V10 Ultra is compatible with a wide range of platforms and popular games - from Forza Horizon 5, to DiRT Rally 2.0, to F1 Series or Euro Truck Simulator 2. Now one set can provide you with endless thrills!

### Full personalization and easy operation

With the PXN NEXUS & SimRacing Control Center app, you can quickly calibrate the gas, brake and use the clutch simulation option. Although the kit has only two pedals (gas and brake), the app allows you to simulate the clutch programmatically, which increases realism in supported games. Setup is quick and intuitive - instead of wasting time on settings, you can get on the track right away.

### Flexible mounting options

The steering wheel is designed for easy mounting - 7 mm mounting holes and adjustable clamp (0-5 cm) allow quick and stable mounting on various desks and stands. The compact design makes the set perfect even in small spaces - from a dorm room to a living room.

### Included:

- Steering wheel
- Steering wheel base
- Pedal set
- Package of mounting accessories
- 24V/2A power adapter
- User manual
