

Flytec V900 12000mah bait boat

Model: V900-12000mah

Manufacturer: FLYTEC

EAN: 5907085523965

Product Code: 884506

R4,178

Flytec V900 12000mah bait boat

The Flytec V900 is an advanced bait boat that combines high capacity, precise control and long run time to make fishing as easy and enjoyable as possible. With two independent bait chambers, a range of up to 500 meters and support for as many as 40 location points, it allows effective baiting even in difficult conditions and on large bodies of water. The waterproof design guarantees reliability for a long time. The navigation system uses GPS and Beidou at the same time, and the 2.4 GHz band communication ensures a stable control signal. The kit includes a remote control.

Nailing with maximum precision

Dual silos with a total payload capacity of about 1.8 kg make it possible to transport a considerable amount of bait. With independent control of each chamber, you can freely decide when and where to dump the mixture. The electromagnetic opening system works quietly without scaring the fish, which increases the effectiveness of fishing. As an added convenience, hook holders in each tray allow you

to conveniently transport your set to the desired location. You can operate the whole thing with one button, which saves time and ensures precise baiting.

Efficient drive and stability

The boat is equipped with two powerful motors with anti-tangle protection and improved three-bladed propellers for more power and longer life. The built-in gyroscope automatically corrects the trajectory, making the Flytec V900 sail stably even against the wind, in waves or with a full load. With the one-button auto-drive function, the boat can sail in a straight line at a constant speed - without the need for constant maneuvering.

GPS and automatic return

The dual GPS + Beidou satellite navigation system allows the boat to record as many as 40 location points. The automatic return function makes the boat return to the starting point on its own in case of low charge, loss of signal or exceeding the maximum range of 500m. In addition, an electronic fence protects the boat - in low power mode it will not sail further than 150 meters from the starting point.

Long operating time

The boat is powered by a 12,000 mAh 7.4V lithium battery, which provides up to 4-6 hours of operation on a single charge - long enough to handle multi-hour fishing sessions without interrupting fishing. The capacious compartment also allows you to use an additional battery (not included) to further extend the operating time. A built-in alarm system will let you know when the charge is low - the boat's lights will start flashing and the remote will beep.

Comfort in all conditions

Thanks to two-color LED lights and a front reflector, the boat is perfectly visible from a distance - even after dark, in fog or rain. The unique LED directional lights allow you to distinguish the turning side of the boat, which increases steering precision and safety. Special Highlighted Atmosphere Light makes the craft visible even at a great distance at night. The ergonomic handle makes it easy to carry, and the impact-resistant ABS hull ensures durability even under heavy use. A double-layer

sealing ring and closed, seamless construction further protect the electronics from water. As a result, the boat operates safely even on rough water.

Full control in your hands

The remote control with LCD display offers clear information about stored GPS points and simple operation of all functions. The control range of up to 500 meters guarantees freedom and reliability, and the auto cruise mode with constant speed allows you to comfortably drive the boat without the need for constant maneuvering. The controller's screen displays key information, including the boat's charge level, GPS signal strength, distance, direction and active navigation points - everything you need while fishing.

Included:

- Bait boat
- Remote control
- Lithium rechargeable battery
- Power charger
- Set of drive and mounting parts (screws, covers, nuts)
- Mounting bracket x2
- Antenna for the remote control
- Connection cable
- User manual

Manufacturer	Flytec
Model	V900-12000mah
Battery	7.4V 12000 mAh

Operating time 2 to 6 hours

Charging time 4 to 8 hours

Speed	6 km/h
Range	500 m
