Ultimea Poseidon D70 Soundbar

The Ultimea Poseidon D70 is an advanced, powerful soundbar that delivers realistic, spacious sound thanks to four speakers, SurroundX™ and BassMX™ technologies, and a wireless subwoofer. Precise sound positioning, artificial intelligence support, and very high audio fidelity allow you to fully immerse yourself in movies, music, and games. Extensive sound customization options via the app, a compact design with wall-mounting option, and broad compatibility with many devices make the Poseidon D70 a complete solution for demanding users.

Sound that draws you in from the very first second

Ultimea Poseidon D70 is a soundbar designed for a full, spatial sound experience in your living room. The 410 W 7.1 channel system creates a realistic soundstage that surrounds you from all sides – front, rear, and sides. This solution clearly stands out from classic 2.0 soundbars, offering a much wider sound field and greater clarity of dialogue, effects, and music. The use of four speakers fills the

room with sound and directs it precisely from specific directions.

Authentic space and accurate positioning

Ultimea SurroundX™ technology was created to bring out even more sound details from every audio track. Combined with a precise spatial positioning algorithm, the speakers are precisely coordinated to locate sound sources and how they propagate through space. The result is a clearer background, better defined environmental details, and a more authentic listening experience.

Sound inspired by reality

The system is supported by artificial intelligence based on accurate information assimilation, trained on billions of real-world sound samples. This optimizes the audio signal to reproduce natural acoustic scenarios as faithfully as possible. The result is a more vivid, dynamic, and realistic sound that sounds natural for both quiet dialogue and intense effects.

Sound fidelity and powerful bass

Transducers made of high-density materials guarantee an extremely precise response to the audio signal. As a result, the Poseidon D70 offers 99.99% sound reproduction, which translates into exceptional detail and clarity. Ultimea BassMX™ technology and a 6.5-inch wireless subwoofer are responsible for deep and powerful bass. The low tones are clear, springy, and well-controlled, adding energy to the sound. The wireless design of the subwoofer allows for greater freedom of placement and a clean aesthetic without unnecessary cables.

Full control with the app

The soundbar supports smart control via an app that turns your smartphone into an advanced remote control. You have 6 preset EQ modes, a 10-band equalizer, and 121 predefined sound correction matrices at your disposal. This allows you to precisely adjust the sound to the content, room, and your preferences without the need for additional equipment. The set also includes an improved, multifunctional remote control that allows quick access to key functions.

Compact form and wide compatibility

The Utimea Poseidon D70 combines a compact design with high power, offering an intense audio experience without taking up much space. The soundbar is designed for wall mounting, making it easy to fit into a variety of interior designs. With an HDMI ARC connector and a wide range of ports (DC IN, FR, FL, AUX, optical, USB), you can easily connect it to 4K TVs, projectors, or laser TVs to create a cohesive and advanced home entertainment center.
