JMGO N1S SE Projector

Exceptional image quality, refined sound, and smart features all packed into a lightweight, portable design—the JMGO N1S SE projector is designed for everyday viewing and cozy movie nights. It offers Full HD resolution with laser-precise color accuracy, automatic settings adjustment, convenient voice control, and wireless content streaming. Thanks to the built-in Google TV system with Netflix, it provides instant access to your favorite platforms. The package is rounded out by an integrated gimbal that lets you position the projection exactly where you want it. It's a solution that combines convenience, quality, and modernity in a single device.

An image that captivates

The projector's MALC™ three-color laser technology delivers exceptionally vivid and realistic color reproduction, offering up to 110% BT.2020 color gamut coverage and color accuracy of $\Delta E1$. The 1080p Laser HD resolution, combined with HDR10 support and a 1600:1 ensures that the image is clear, rich in detail, and well-balanced—in both bright and dark scenes. The 800 ISO lumens of

brightness delivers a crisp, high-contrast image in controlled lighting conditions, making this model the ideal choice for evening screenings and intimate viewings.

Sound that fills the room

The integrated JMGO Master Sound audio system delivers rich, immersive sound without the need for additional speakers. Two 2 × 5 W drivers, supported by Dolby Audio, Dolby Digital, and DTS technologies, ensure clear dialogue, distinct details, and dynamic sound. Whether you're watching a movie, listening to music, or playing games, the sound naturally complements the picture and creates a truly cinematic atmosphere.

Smart entertainment at your fingertips

The built-in Google TV system with native Netflix support provides quick access to the most popular streaming platforms without the need to connect additional devices. The Chromecast feature lets you wirelessly stream movies, photos, and music directly from your smartphone or tablet, while Google Assistant allows you to control the projector with your voice—from searching for content to changing settings. This convenience makes using the projector intuitive from the very first time you turn it on.

A perfectly aligned image

Advanced automatic correction features make setting up the projector quick and hassle-free. Autofocus and automatic keystone correction ensure that the image is always sharp and properly aligned, regardless of the projection location. The Smart Eye Protection feature enhances user comfort by automatically pausing the projection when someone approaches the device, protecting eyesight and improving safety.

Flexible positioning thanks to the integrated gimbal

The integrated mount with a gimbal mechanism allows for horizontal projection angle adjustment up to 360° and vertical adjustment up to 127°. This makes it easy to project onto a wall, ceiling, or in a less standard space, adjusting the setup to your needs. The sturdy construction ensures a secure mount, and the smooth adjustment makes changing the position a breeze.
