

Creality Space Pi Plus Filament Dryer

Model: 4005010071

Manufacturer: CREALITY

EAN: 6971636402961

Product Code: 885814

R2,115

Creality Space Pi Filament Dryer Plus

The Creality Space Pi Filament Dryer Plus is an advanced filament dryer that is designed to double drying capacity. With the ability to accommodate two rolls of filament at the same time, this device provides fast and efficient drying, resulting in better quality 3D prints. The dryer is equipped with precise temperature control and 360° PTC technology, which guarantees even heating and effective removal of moisture from the filaments, preventing problems such as nozzle clogging, poor layer adhesion or misalignment during printing.

Double drying performance

The Creality Space Pi Filament Dryer Plus can accommodate two rolls of filament weighing up to 1 kg each, allowing more material to be dried simultaneously. The unit is equipped with four filament slots and PTFE tubes, allowing users to use a wide range of filaments and connect the dryer to two 3D printers simultaneously. This design makes it ideal for larger-scale printers who need an efficient

tool for preparing filaments.

Advanced PTC heating technology

The Creality Space Pi Plus Dryer uses 360° dual PTC heating technology, which provides fast and even heating of the filaments. As a result, the device effectively removes moisture from the material, which significantly improves the quality of prints. Compared to standard PI heating pads, PTC technology is more efficient, energy-saving and environmentally friendly.

Easy operation and precise control

The unit is equipped with a 4-inch touchscreen that allows easy monitoring of real-time drying parameters such as temperature, humidity and remaining drying time. A setting memory function allows for quick resumption of operation after any power interruption, eliminating the need for re-configuration and speeding up the drying process. The dryer supports 12 popular types of filaments, and with the one-button function, you can easily adjust the drying parameters for your specific material.

Versatility and safety

The Creality Space Pi Filament Dryer Plus is compatible with 1.75mm and 2.85mm diameter filaments, making it a versatile tool for many 3D printers. The device has additional features such as switching between degrees Celsius and Fahrenheit, a power on/off switch for increased safety, and a silicone plug to protect against moisture. These features make the dryer not only efficient, but also safe to use, providing optimal conditions for drying filaments before 3D printing.

Name:	Creality Space Pi Plus Filament Dryer
Manufacturer:	Creality
Model:	4005010071
Package dimensions:	343 x 226 x 300 mm
Net weight:	1900g

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Product color: Star gray

Input voltage: US 110V 50/60Hz, GB/UK/EUR 220V 50/60Hz

Rated power: 260W

Temperature control range: 45°C-70°C

Drying time: 0-48 hrs.

Filament diameter: 1.75mm/2.85mm

Gross weight: 2510, Net weight: 1900, Box length: 34,00, Box width: 22,50, Box height: 29,00, GPSR
