Flytec V805 GPS 12000mAh bait boat

Model: V805 gps 12000mah

Manufacturer: FLYTEC

EAN: 5905156104686

Product Code: 888299

R3,884

Flytec V805 GPS Bait Boat 12000mAh

The Flytec V805 GPS is a modern bait boat designed with precision, comfort, and maximum fishing efficiency in mind. It combines advanced navigation with GPS and Beidou systems, an auto-return function, and the ability to operate at a distance of up to 500 meters. Thanks to the water temperature sensor, intelligent steering, and the ability to deploy a fishing rig, it allows you to better control every stage of the fishing process. Refined night lighting and a clear display ensure comfortable use even after dark, while the large 12,000 mAh battery enables long, uninterrupted operation. This is equipment that combines technology with practical application on the water.

Precise navigation and stability on any body of water

Boat control is intuitive and smooth—you can move freely forward, backward, and turn in any direction, adjusting your movement to the conditions on the water. A built-in, high-precision gyroscope automatically corrects the course, eliminating deviations and ensuring stable handling.

This allows the boat to maintain its set course even in changing conditions, resulting in greater control and precision.

Automatic Routes and Cruise Mode

The cruise control feature allows you to maintain a constant speed and direction without the need for constant monitoring, significantly reducing the need for manual operation. The ability to program waypoints and automatically navigate between them allows the boat to follow a designated route on its own. This is an ideal solution for repetitive baiting operations, saving you time and letting you focus on your fishing strategy.

Range that gives you complete freedom of operation

A remote control with a range of up to 500 meters opens up entirely new possibilities for working on larger bodies of water. You can easily reach hard-to-access spots, where the best fishing spots are often hidden. Stable communication ensures reliable control even at greater distances, which is crucial for precise bait placement.

Advanced positioning and fishing spot planning systems

The integrated GPS and Beidou system enables precise positioning and intelligent calibration. The ability to save up to 4 fishing spots and 24 anchor points offers tremendous flexibility and allows you to adapt the boat’s operation to various scenarios. The electronic GPS anchor function keeps the boat in a designated spot, automatically reacting to drift and returning it to the saved position.

Safety in every situation

The automatic return system activates in several situations—at the press of a button, when the battery is low, if the signal is lost, or if the range is exceeded. This ensures the boat always returns safely to the starting point, minimizing the risk of losing it. An extensive lighting system makes using the boat at night convenient and safe. Bright front lighting facilitates navigation on the water, while rear directional lights indicate the direction of travel. You can choose between two operating modes (steady or flashing light), allowing you to adjust visibility to the surrounding conditions.

Real-time monitoring of distance and water parameters

The boat continuously transmits information about the distance traveled, allowing you to accurately monitor the route and use it for measurements on the water. Additionally, the built-in temperature sensor operates within a wide range from -40°C to 99°C, providing up-to-date data on conditions in the fishing area. This is a valuable guide when selecting the best fishing spots.

Precise deployment of the fishing rig

The hook-setting and line-deployment functions allow you to place the rig exactly where you want it. This increases fishing effectiveness, especially at longer distances or in hard-to-reach locations. The boat’s precision translates directly into better results on the water.

Intuitive operation and comfort in all conditions

Equipped with a color screen and backlit buttons, operation remains comfortable even after dark. All essential information is clearly displayed, and controls are intuitive regardless of lighting conditions. Combined with a powerful 12,000 mAh battery, you get equipment ready for long, demanding trips without the need for frequent recharging.

Included

- Boat with lure
- Remote control
- Battery
- Charging cable
- Antenna
- Propellers x2
- Sticker
- Lanyard*
- Remote control charging cable
- User manual

Manufacturer	Flytec
Model	V805
Material	ABS plastic and electronic components
Color	Orange
Dimensions	38 x 20.5 x 16.5 cm
Weight	1568 g
Operating time	4h
Charging time	8h
Control range	500 m
Maximum speed	25 km/h
Battery	7.4V 12000mAh
Frequency	2.4G
Maximum load	1500 g
Remote control battery	3.7V 2000 mAh

Gross weight: 2180, Net weight: 8600, Box length: 42,00, Box width: 21,00, Box height: 24,50, GPSR Link: https://psr-assets.innpro.pl/fishing/sg_fishing_bait_boats.pdf
