Product Code: 891400

R39,806

NAVEE Birdie 3X Electric Golf Cart

The NAVEE Birdie 3X is an advanced electric golf cart equipped with an Auto-Follow feature based on precise Ultra-Wideband (UWB) technology, remote control, mobile app operation, and a powerful 220 Wh battery that allows you to cover over 36 holes on a single charge. Two independent motors with a maximum power of 2×240 W ensure smooth movement across the golf course and allow you to tackle slopes with a gradient of up to 25%. A stable design with a 4+1 wheel system, 9 speed levels ranging from 1 to 9 km/h, a large LED screen, and a comprehensive set of accessories ensure that the cart combines ease of use with practical solutions for every round. Its foldable design, IPX5 splash resistance, and a maximum load capacity of 30 kg make the NAVEE Birdie 3X a functional partner for every golfer.

Auto-Follow with UWB technology - a cart that truly follows the player

The Birdie 3X is equipped with an Auto-Follow feature, allowing it to automatically follow the user without the need to steer or push. The system uses Ultra-Wideband (UWB) technology, which offers significantly greater precision than standard wireless solutions. In practice, this means it maintains a stable position relative to the player and responds quickly to changes in direction or walking speed. This allows you to move freely around the course and focus all your attention on the game.

Remote Control, App, and Instant Response

The cart can be operated using the included remote control or mobile app. The remote control allows you to start, stop, or change the direction of travel with a single button, ensuring convenient control from anywhere on the course. The app lets you adjust the speed, check the battery level, customize settings, and monitor your game results. This makes all the most important functions intuitively accessible, without having to bend down to the control panel.

Two motors and the power to tackle hills

Two independent motors driving the rear wheels ensure a smooth and confident ride even at a maximum load of 30 kg. This power reserve allows you to comfortably transport a full golf bag along with accessories. The cart easily handles inclines of up to 25%, maintaining stability and good control. This solution works well both on flat fairways and on more challenging sections of the course, where the ground may be soft or uneven.

Power-Assist Mode - Support During Manual Pushing

The NAVEE Birdie 3X also offers Power-Assist mode, in which the motors assist the user while manually pushing the cart. This feature is particularly useful on steep inclines, in tight spaces, or where the user wants direct control over the direction of travel. The cart then moves smoothly and naturally, reducing the effort required to steer. This practical solution enhances comfort in various situations on the golf course.

Stability thanks to the 4+1 wheel system

The design, based on four wheels and an additional detachable anti-tip wheel, ensures excellent stability. The 11-inch (approx. 28 cm) rear all-terrain wheels offer good traction on various surfaces,

while the two 6-inch (approx. 15 cm) front swivel wheels facilitate maneuvering. The additional wheel prevents the cart from tipping over when driving uphill. This keeps the cart stable, allowing the user to move confidently even on uneven terrain.

220 Wh battery - power for two full rounds

The high-performance 220 Wh lithium-ion battery allows you to cover over 36 holes, or at least two full 18-hole rounds. This is a practical solution for those who want to play without worrying about needing to recharge during the day. The smart energy management system optimizes power consumption to make the most of the battery’s capacity. A full charge takes about 7 hours, so you can conveniently prepare the cart for the next round overnight.

Large LED screen and intuitive controls

The central panel features a clear LED screen measuring approximately 140 × 35 mm. It displays key information, such as battery level and current speed settings, while remaining clearly visible even on sunny days. Users have 9 speed levels at their disposal, allowing them to easily adjust the driving pace to their preferences. The panel is also equipped with a USB-C port, which enhances the convenience of daily use.

Foldable design and rain resistance

The stroller can be quickly folded down to compact dimensions of 680 × 565 × 384 mm, making it easy to transport in a trunk and store during the off-season. When unfolded, it measures 1267 × 565 × 955 mm, offering a stable and user-friendly design. The IPX5 rating ensures resistance to splashes and rain, allowing the stroller to be used even in less favorable weather conditions. The body can be easily cleaned with a damp cloth, taking care to avoid high-pressure washing.

Manufacturer	NAVEE
Model	Birdie 3X
Product type	electric golf cart
