Increase storage capacity of your system with 2-TB Hard Drive from Dell™. It offers rotational speed of up to 7200 RPM that provides fast disk access. Moreover, its SAS interface delivers enhanced data transfer speed. This product has been tested and validated on Dell systems. It is supported by Dell Technical Support when used with a Dell system.

Hard drives are system specific for Laptops. However, you need to know the interface type for desktops and servers to choose the right product. Hence we recommend that you use the Service Tag feature in the Parts For Your Dell™ tool to choose the right hard drive for your desktop or server. For Laptops, you can either use System Drill Down or Service Tag feature.

Refurbished Spare Parts are parts retrieved from Dell-branded systems that have been returned, some of which have never been used. All Dell refurbished spare parts are certified to comply with all original Dell factory performance specifications and come with a 90-day limited hardware warranty.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.
