

GODOX TT350 TTL Flash for Nikon

Model: TT350N

Manufacturer: GODOX

EAN: 6952344211076

Product Code: 913262

R2,612

GODOX TT350N Flash

The GODOX TT350N flash for Nikon is a compact model with a guide number of 36, designed for Nikon mirrorless cameras. It supports TTL auto mode, HSS flash synchronization up to 1/8000 s, and the Godox X wireless system with Master and Slave functions. It weighs just 210 g, and when the head is tilted forward, its height is only 9.5 cm, making it a great fit for compact cameras and keeping your photography setup lightweight. The set includes a diffuser, a stand, a carrying case, and the original packaging. To get started, you'll need to purchase two AA (R6) batteries, which are not included in the set.

Compact Design for Everyday Photography

The Godox TT350N was designed with mirrorless camera users in mind, so its small size complements compact camera bodies well. The flash measures 14 × 6 × 3.5 cm and weighs 210 g, so it takes up very little space in a camera bag. When mounted on the camera and with the head

facing forward, it stands just 9.5 cm tall, making it more comfortable to use while shooting on location. The lightweight design makes extended shooting sessions more comfortable, and the kit itself remains well-balanced.

Adjustable Head and Light Control

The flash head rotates 270° horizontally and from -7° to +90° vertically, making it easy to bounce light off walls and the ceiling. This allows you to achieve softer, more natural-looking lighting without the need for additional accessories. The built-in zoom operates in the 24–105 mm range and can function in both automatic and manual modes, adjusting the beam angle to match the lens’s focal length. The head also features a wide-angle diffuser corresponding to a focal length of approximately 15 mm and a reflector, and the kit includes an additional diffuser to soften the light.

Various operating modes and the Godox X wireless system

The flash offers a TTL mode that automatically adjusts the flash output, making it easier to shoot in varying lighting conditions. A manual mode with S1 and S2 functions is also available, as well as a Multi-stroboscopic mode, which allows for multiple flashes during a single exposure. The built-in Godox X system transmitter allows you to control other compatible flashes as a Master unit or operate as a Slave unit controlled by an external trigger. This allows the TT350N to be used both as a standalone flash and as part of a more extensive lighting system.

Included

- Godox TT350N flash
- Diffuser
- Stand
- Carrying case
- Manufacturer’s packaging
