

MOES WC-YH-LS Wi-Fi Roller Shutter Motor

Model: WC-YH-LS-EU-MS

Manufacturer: MOES

EAN: 6974246474748

Product Code: 917522

R2,007

MOES WC-YH-LS Wi-Fi Roller Shutter Motor

The convenience of controlling your roller shades reaches a whole new level with the MOES WC-YH-LS Wi-Fi motor, which combines automation, remote access, and voice control in a single device. Integration with the Smart Life app, Amazon Alexa, and Google Assistant lets you manage your window coverings exactly how you like—from your phone, a remote control, or with a voice command. The ability to set schedules and timers gives you full control over your daily routine, and its wide compatibility ensures the device works with many types of blinds and curtains. This solution simplifies everyday life and brings the convenience of smart homes into your interior.

Control on Your Terms

The motor offers full control flexibility, tailored to various usage scenarios. You can use the Smart Life app, an RF controller, a wall-mounted button, or convenient voice commands via Amazon Alexa and Google Assistant. What's more, the system allows you to control a single roller shade or manage

multiple ones simultaneously, which works well in larger spaces. The remote access feature lets you control your shades even when you're not at home, increasing convenience and your sense of security.

Automation tailored to your day

With the Smart Life app, you can precisely set the opening and closing times for your blinds, creating a schedule perfectly tailored to your lifestyle. A countdown timer is also available, allowing you to schedule the device's operation in advance—for example, closing the blinds after a specified number of hours. This practical solution ensures your home responds to your needs without requiring manual intervention.

Wide compatibility with various window covering systems

The MOES WC-YH-LS motor is designed to work with many types of window coverings. It easily handles vertical blinds, fabric roller shades, Roman shades, zebra blinds, Venetian blinds, as well as curtains and sheers. This allows you to use it in various rooms and interior designs without having to find separate solutions for each type of window covering.

Stable operation and well-thought-out design

The device requires mains power via an AC adapter, ensuring continuous and stable operation without the need to charge batteries. Additionally, the chain- or cord-driven design is engineered to prevent the mechanism from slipping off the guide rail, reducing the risk of damage and enhancing safety.

Sharing and convenience for the whole family

The motor allows for easy access sharing with other household members, so everyone can use its features. A single device can be controlled by multiple smartphones, and a single phone can manage multiple motors in the home. Additionally, support for a 3V battery-powered RF remote control (not included) provides another control option, particularly useful for everyday use.

- roller shutter motor (main unit)
- remote control
- control module / receiver (marked L/R)
- AC power adapter with cable
- mounting bracket
- mounting hardware
- drive components for roller shutter chain
- 3M VHB mounting tape
- user manual

Manufacturer	MOES
Model	WC-YH-LS
Torque	1.35 N·m
Frequency	2.4 GHz, 433 MHz

Maximum roller shutter size 2.5 m × 3.5 m

Speed	50-55 rpm
Voltage	12 V

Maximum load capacity 10 kg

Control method Mobile or remote

Power supply voltage 110-240 V

Rated current 1.2 A

Range Unlimited

Compatibility Direct connection to Google Assistant, Alexa, etc.
