

MOES WCM-S26 4MP Wi-Fi IP Camera

Model: WCM-S26-MS

Manufacturer: MOES

EAN: 6978507850937

Product Code: 917529

R1,751

MOES WCM-S26 4MP Wi-Fi IP Camera

The MOES WCM-S26 is an outdoor camera with a resolution of 4 MP (1440P), equipped with an integrated solar panel and a 6000 mAh battery, ensuring long-lasting, independent operation without a constant connection to a power source. It supports 2.4 GHz and 5 GHz Wi-Fi connectivity, offering stable remote viewing via the MOES and Tuya apps. The ability to switch between HD (1440P) and SD (360P) modes allows you to adjust image quality to available bandwidth and save data.

Wide viewing angle and flexible adjustment

The camera offers a wide field of view—92° horizontally and 66° vertically—allowing you to effectively monitor a larger area. The design allows for manual adjustment—360° rotation at the base and 90° tilt—so you can precisely set the viewing direction and adapt it to the installation location.

Clear night vision - in color and infrared

The WCM-S26 model ensures effective monitoring even after dark thanks to two night vision modes. Full-color mode utilizes built-in lighting (spotlight), which not only improves visibility but also acts as a deterrent. Infrared mode, on the other hand, provides classic black-and-white viewing in complete darkness. This ensures the camera remains highly effective around the clock.

Intelligent detection and immediate response

The camera uses human silhouette detection, which helps reduce false alarms caused by animals or other objects. Upon detecting motion, the device can trigger a siren, turn on the lighting, and send a notification to your smartphone. The ability to define activity zones allows you to monitor only selected areas.

Two-way communication and integration

The built-in microphone and speaker enable real-time conversations via the app. The camera also supports integration with Amazon Alexa and Google Home for video viewing. The Bluetooth pairing feature simplifies setup and allows for quick connection to the network.

Efficient storage and environmental resistance

The camera supports H.264 and H.265 compression, which reduces storage and bandwidth usage by up to 50%. Recordings can be saved to microSD cards (32 GB, 64 GB, 128 GB) or in the cloud (paid service). The IP65-rated housing protects the device from rain and dust, and the operating temperature range of -10°C to 50°C ensures reliable operation in various weather conditions.

Included

- camera
- mounting bracket
- screws
- USB cable
- user manual
