5-in-1 Multifunctional Camera Tripod

The 5-in-1 multifunctional camera tripod is a versatile solution for photographers, videographers, and content creators who expect maximum functionality in a single product. Made of 10-layer carbon fiber and aluminum alloy, it offers five operating modes: tripod, monopod, freestanding monopod (thanks to the short, screw-in base legs), desk tripod, and trekking pole. With a load capacity of up to 20 kg and a weight of just 1.65 kg, its design ensures stability even when working with heavy photographic equipment. Adjustable height from 17.5 to 157 cm, an integrated smartphone holder, a 360° ball head, and compact dimensions when folded (55 × 7 cm) make this tripod ideal for both studio use and travel.

One tripod—five practical uses

This model was designed for users who don't want to carry around several different accessories. Depending on your needs, you can quickly convert it into a classic camera tripod, a monopod, a

freestanding monopod with short legs, a desk tripod, or a trekking pole. As a result, the same equipment works well for landscape photography, video recording, live streaming, product photography, and mountain hikes. Changing the configuration is quick and requires no additional parts beyond the accessories included in the set.

Stable construction for lightweight and professional gear

The combination of carbon fiber and a durable aluminum alloy ensures high structural rigidity while keeping the weight low. A maximum load capacity of 20 kg allows for the safe use of mirrorless cameras, DSLRs, camcorders, spotting scopes, or other devices equipped with a standard mounting thread. The 35 mm diameter ball head ensures smooth framing and secure support for your equipment. The leg twist locks effectively secure the selected height, allowing the tripod to remain stable even when working with heavier setups.

Freedom to frame your shot in any conditions

The height adjustment range from 175 to 1570 mm allows you to adapt the tripod's setup to various shooting situations. The legs can be spread at three angles—22°, 55°, and 85°—which makes it easier to set up your equipment stably on uneven ground. The reversible center column allows you to take impressive macro photos and shots from a very low angle without the need for additional accessories. The head offers 360° panoramic rotation and up to 90° tilt, making precise framing convenient for both photography and videography.

Convenient camera and smartphone operation

The tripod is equipped with an Arca-type quick-release plate with a 1/4" thread, so mounting your camera takes just a moment. The plate itself measures 65 × 38 × 10 mm, making it easy to adapt to compatible mounting systems. The integrated smartphone mount supports devices ranging from 52 to 85 mm in width, so it fits most modern phones, including many models used with cases.

Additional features include a built-in spirit level, two 1/4"-20 accessory threads for mounting a light or microphone, and an integrated hook that doubles as a tool, allowing you to quickly add weight to the tripod or make minor adjustments without having to search for additional accessories.

A compact companion for every trip

Despite its extensive capabilities, the tripod weighs only 1.65 kg, so it's not a burden to carry. When folded, it measures 55 cm in length and just 7 cm in diameter, so it fits easily into the included carrying case and can be conveniently packed in a backpack or luggage. The sturdy construction is designed for heavy-duty use both in the field and in the studio. It's a practical choice for those looking for a single tripod for photography, videography, mobile work, and everyday trips.

Included

- 5-in-1 camera tripod
- Short legs for desktop mode and freestanding monopod x 3
- Arca-Type quick-release plate
- Weight hook
- Allen wrenches x 2
- Carrying case
- User manual
