

QOLTEC 53705 LiFePO4 lithium iron phosphate battery 12.8V 100Ah 1280Wh BMS

Model: 53705

Manufacturer: QOLTEC

EAN: 5901878537054

Product Code: 929501

R5,302

Discover the power of reliability and efficiency with the Qoltec lithium iron phosphate battery. Designed for those who demand dependable energy storage, this battery boasts a substantial 100 Ah capacity and 1280 Wh, making it an ideal solution for a wide range of UPS and power device applications. Its advanced lithium iron phosphate technology not only ensures a longer lifespan but also provides a safe, more stable power source compared to traditional batteries. Engineered to withstand the challenges of diverse environments, it operates flawlessly within a temperature range of -15°C to 60°C. The inclusion of a Battery Management System (BMS) and overcharge protection further enhances its safety features, ensuring peace of mind and reliability. Moreover, its IP65 rating ensures protection against dust and water, while compatibility with M8 ring terminals offers convenience in connectivity. Whether for professional or personal use, this battery is built to deliver performance and safety.
