Model: 4780909

Manufacturer: HERCULES

EAN: 3362934746094

Product Code: 930269

R7,099

Hercules DJControl Inpulse 500 is the new DJ controller that lets you achieve your ambitions! Created for Serato DJ Lite and DJUCED to help you get started DJing, refine your skills and perform in front of audiences, DJControl Inpulse 500 has a professional design with a sturdy metal backing plate, and tons of great features: four extendable/retractable non-slip feet to elevate your mixing, a hardware mixer for the audio inputs, a dedicated Filter/FX area with awesome effects, two large jog wheels with touch detection for scratching, 16 backlit rubber RGB pads, helpful light guides for mixing with total confidence... and so much more.

You can even mix with music streaming services, featuring millions of tracks — including TIDAL and SoundCloud GO+ in Serato DJ Lite, and Beatport LINK, Beatsource LINK and Qobuz in DJUCED.

SMOOTH, ORIGINAL TRANSITIONS

The Filter/FX area lets you customize your set with the effects available in Serato DJ and DJUCED.

You can even combine the action of the filter on an effect in DJUCED!

MIX A BACKUP EXTERNAL SOURCE

Input hardware mixer: the “AUX filter” knob lets you add a filter effect onto an external audio source (smartphone, media player...) — independently of the software!

SOLID RETRACTABLE FEET

DJControl Inpulse 500 is 3.1” / 8 cm tall with its feet extended. Elevate your mixing: run wires underneath, and protect the controller from spilled drinks. The base is backlit when the feet are extended (i.e. folded out).

GET SET UP QUICKLY

Powered via USB, DJControl Inpulse 500 has the master outputs you need to connect your speakers (2 x 1/4” / 6.35 mm jack + 2 x RCA), plus two headphones connectors (1/8” / 3.5 mm stereo mini-jack + 1/4” / 6.35 mm stereo jack).

SYNC YOUR TRACKS MANUALLY

It’s easy to manually mix one track into another with the BEATMATCH GUIDE light guides, which are supported by both DJUCED and Serato DJ Lite.

CONNECT YOUR MICROPHONE

Connect your microphone to the balanced input, and use the High EQ knob and Low EQ knob to adjust your voice so that you can be heard clearly wherever you’re performing.

ASSISTANT

The Intelligent Music Assistant (IMA) in DJUCED suggests well-suited upcoming tracks to be played from your music library, and in Beatport LINK and Beatsource LINK as well. Enable the Assistant to launch Autoplay in Serato DJ Lite.

ADJUST YOUR CROSSFADER

Easily adjust the amplitude of the crossfader according to your style of music. Use the curve switch to change the crossfader curve directly on the controller (mix, scratch or off)!
