USB 3.0 Ethernet cable, A/M to RJ45/M, 1 Gbps, active, black/grey, 10 m" from LogiLink

The LogiLink USB-CAT6-LAN adapter cable is the practical Ethernet solution for all USB-A devices without their own RJ45 port. Thanks to the chipset built into the USB plug, the cable replaces the USB-A to RJ45 adapters that were previously always required. With this cable, an Ethernet connection with a data transfer rate of up to 1 Gbit/s is immediately available without any additional drivers. Connect your router, modem or network switch to the USB-A port of your PC, laptop or tablet. Thanks to foil shielding (FTP), the data transfer is effectively protected against interference. The textile sheath of the cable has a pleasant feel and also protects the cable against abrasive wear. High-quality and robust metal plugs with bend protection ensure a particularly long service life. The
