

DDPAI Ranger M1 Dash Cam

Model: Ranger M1

Manufacturer: DDPAI

EAN: 6934915204571

Product Code: 932788

R2,128

DDPAI Ranger M1 Dash Cam

The DDPAI Ranger M1 is a compact dashcam capable of recording video at 3K resolution (2880 × 1620) at 30 fps or 2K resolution (2560 × 1440) at 30 fps. The camera features a lens with a bright F1.55 aperture and a wide 145° field of view, as well as a six-axis gyroscope and app-based stabilization technology. It also features 5 GHz Wi-Fi with Wi-Fi Turbo technology, Bluetooth BLE 5.4, and support for microSD cards with capacities up to 256 GB, while its IP67 rating ensures dust and water resistance.

Detailed 3K Video Recording

The 2880 × 1620 resolution allows for highly detailed video capture, which is essential when documenting events along the route. Recording takes place at 30 frames per second, and alternatively, you can select 2K resolution (2560 × 1440) at the same frame rate. The 145° field of view captures a wide area in front of the lens, allowing the camera to record more elements within its range.

Bright F1.55 Aperture and Image Stabilization

The DDPAI Ranger M1 lens features a bright F1.55 aperture that lets in more light, which improves video quality in low-light conditions. This feature is particularly important when driving at dusk or using the camera in dimly lit areas, such as underground parking garages. The dashcam is also equipped with a six-axis gyroscope, and the app-based stabilization technology helps minimize the impact of vibrations on the recorded footage.

5 GHz Wi-Fi and support for cards up to 256 GB

The DDPAI Ranger M1 uses 5 GHz Wi-Fi with Wi-Fi Turbo technology and also supports the Bluetooth BLE 5.4 standard. Recordings can be stored on a microSD card with a capacity of up to 256 GB, allowing you to tailor the amount of available storage to your usage needs. The large maximum capacity of the supported card is particularly useful for people who regularly use the dashcam and record a lot of footage.

Manufacturer	DDPAI
Model	Ranger M1
3K Resolution	2880 × 1620, 30 fps
2K Resolution	2560 × 1440, 30 fps
Aperture	F1.55
Field of View	145°
Stabilization	app-based stabilization technology
G-Sensor	six-axis gyroscope
Wi-Fi	5 GHz with Wi-Fi Turbo technology
Bluetooth	BLE 5.4

Supported memory cards microSD up to 256 GB

Power	USB-A / Intelligent Hardwire Kit
Battery	Super Lithium 80 mAh

Protection Rating IP67

Operating Temperature -20°C to 45°C

Dimensions 63 × 30.5 × 29.6 mm

Weight 91 g
