

Flytec V066 18000mAh bait boat

Model: V066 18000mah

Manufacturer: FLYTEC

EAN: 5905156104662

Product Code: 938194

R6,461

Flytec V066 18000mAh Bait Boat

Modern fishing should be based on convenience, precision, and high effectiveness—and these are precisely the features that set the Flytec V066 bait boat apart, with its powerful 18000 mAh battery. A long control range, a color screen on the remote, and intuitive one-handed operation make maneuvering the rig incredibly easy. Powerful brushless motors and a refined design ensure smooth movement even in challenging conditions, while thoughtful details—such as night lighting and an anti-tangle system—allow for unrestricted operation. This is equipment that supports effective baiting and rig management on the water.

Range and control without compromise

Remote control at a distance of up to 1,000 meters opens up completely new possibilities for planning baiting and rig placement. The built-in, high-resolution color screen provides a clear overview of the most important information, and the backlit buttons make operation easy even after

dark. The ergonomic design allows you to comfortably control the boat with one hand, significantly increasing comfort during long fishing trips. Additionally, the dual-antenna system stabilizes the connection, ensuring reliable control in all conditions.

Power that makes a difference

Power is provided by efficient brushless motors rated at 12V, 20A, and 172.26 W, reaching speeds of up to 7,160 RPM. This configuration translates to dynamic acceleration and a maximum speed of up to 20 km/h. The brushless design eliminates the need for break-in and minimizes the risk of overheating, which increases the drive system's service life. The entire unit is IP68-rated, making the boat resistant to water, mud, and saltwater, and allowing its components to operate for over 2,000 hours while submerged.

Durability refined in every detail

A sturdy stainless steel shaft and aluminum housing ensure resistance to corrosion, wear, and heavy-duty use. Additionally, a special anti-fouling guard has been installed, which effectively prevents grass from getting tangled in the propeller. Thanks to this, the boat maintains full performance even in overgrown bodies of water, where standard designs often fail. This solution significantly increases reliability and smooth operation in demanding conditions.

Smooth operation and maximum efficiency

The modern, four-blade propeller with a diameter of 6 cm was designed to optimize hydrodynamics. The larger blade surface area translates to better thrust, lower water resistance, and more stable movement. The result is faster, smoother movement on the water, allowing you to precisely reach your destination without unnecessary energy loss.

Adapting to Different Conditions

The boat offers two-speed adjustment, making it easy to adapt its performance to the current conditions on the fishing grounds. The cruise mode allows you to maintain direction and speed without the need for constant steering, letting you focus fully on fishing. Additionally, precise course adjustment (yaw fine-tuning) makes it easier to hit the selected spot accurately.

Effective baiting and greater capabilities

The bait hopper, with a capacity of up to 3 kg, allows you to transport various types of bait—from corn and pellets to loose mixes. This lets you flexibly adapt your baiting method to the chosen technique and fish species. The boat is also equipped with a high-torque net retrieval device that allows for convenient, one-touch activation of the trawling and release functions.

Thoughtful details for greater comfort

The Flytec boat features solutions that significantly enhance user comfort. The battery level indicator allows for constant monitoring of power, and bright navigation lights facilitate orientation after dark. Power is supplied by a high-capacity, efficient 11.1 V battery, which ensures long runtime and stable performance even during intensive use.

Included

- Bait boat
- Boat battery
- Remote control
- Lanyard
- Charger
- USB-C cable for charging the remote control
- Antennas x2
- Spare propellers x2
- Boat bag
- Boat stand
- User manual

Manufacturer	Flytec
Model	V066
Material	ABS plastic
