

Flytec V066 GPS Bait Boat, 18,000 mAh

Model: V066 gps 18000mah

Manufacturer: FLYTEC

EAN: 5905156104679

Product Code: 938195

R9,632

Flytec V066 GPS Bait Boat 18000mAh

The modern Flytec V066 GPS bait boat is designed for anglers who demand full control, range, and reliability in all conditions. It combines intelligent navigation, precise GPS + Beidou positioning, and advanced automatic features that streamline your fishing experience. A powerful brushless motor, long control range, and extended runtime allow for unrestricted operation even on larger bodies of water. Add to that a well-designed baiting system, night lighting, and safety features that protect your equipment. This solution eliminates randomness and gives you full control over every stage of the fishing process.

Smart navigation and course stability

The V066 model offers complete control—it moves forward, backward, and makes precise left and right turns, allowing it to easily adapt to various conditions on the water. The built-in high-precision gyroscope automatically corrects the course, eliminating deviations and ensuring stable, smooth

handling. The constant speed function allows you to maintain a steady pace without constant intervention, enhancing comfort during longer sessions. Spot Cruise mode, meanwhile, enables automatic navigation between saved fishing spots.

Operation tailored to your needs

The independent bait release system allows for precise bait delivery to a selected location with a single button press. This lets you precisely control the amount and location of the bait, which is crucial for more demanding fishing conditions. The use of a dual high-gain antenna ensures stable signal transmission and high resistance to interference. The result is the ability to control the boat from a distance of up to 1,000 meters. This range opens up entirely new possibilities for working on large bodies of water and allows you to reach places where traditional methods fail.

Long operating time and intelligent power management

Equipped with a modular power system featuring two high-capacity 18,000 mAh batteries, the boat provides up to 3 hours of uninterrupted operation. Intelligent power management ensures stable operation, and the built-in low-battery alarm warns you when it's time to return. This minimizes the risk of sudden interruptions.

Visibility after dark and safety

The integrated lighting system significantly improves usability after dark. A bright navigation light at the front facilitates orientation on the water, and two operating modes (steady and flashing) allow you to adjust the lighting to the surrounding conditions. The Beidou-supported GPS system ensures highly accurate positioning and automatic route calibration. You can save up to four fishing grounds and as many as 200 fishing spots, to which the boat automatically returns with a single button press. The return-to-start function also works in emergency situations (such as low battery, signal loss, or exceeding range).

Smart safety features and position control

The V066 model offers an electronic anchor function that keeps the boat in one place despite wind or current. The electronic fence, on the other hand, allows you to set a safety zone of up to 800

meters, preventing the boat from drifting outside the designated area. Additionally, you can view the distance traveled in real time, which facilitates navigation and planning activities on the water.

Powerful propulsion and reliability in challenging conditions

The 12-volt brushless motor delivers powerful performance, reaching speeds of up to 7,160 RPM and a maximum boat speed of 20 km/h. A large, four-blade propeller with a diameter of 6 cm minimizes water resistance and allows for smooth, fast movement. An aluminum guard protects the drive from aquatic vegetation, preventing tangling and ensuring stable operation even in challenging waters.

Included

- RC boat*
- Boat battery
- Remote control
- Lanyard
- Charger
- USB-C cable for charging the remote control
- Antennas x2
- Spare propellers x2
- Boat bag
- Boat stand
- User manual

Manufacturer	Flytec
Model	V066
Material	ABS plastic
Color	Black
Dimensions	52.7 x 26.4 x 50 cm
Weight	3781 g
Battery	11.1V 18000mAh

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Operating time	4h
Charging time	7h
Maximum speed	20 km/h
Control range	1000 m
Maximum load	3 kg

Remote control battery 3.7V 2000mAh

Gross weight: 6260, Net weight: 12700, Box length: 60,50, Box width: 31,50, Box height: 41,50,
