

MERACH MR- 2429B3 Trampoline, 4.5 m

Model: MR-2429B3-EU

Manufacturer: MERACH

EAN: 5905156109407

Product Code: 939024

R11,409

MERACH MR-2429B3 4.5 m Trampoline

The MERACH MR-2429B3 trampoline, with a diameter of 4.5 m, is designed for safe and comfortable outdoor fun. The model features a high safety net, a convenient ladder, 80 springs each 140 mm long, and a stable, four-legged frame. The maximum weight capacity is 150 kg, allowing both children and adults to use the trampoline. The curved design of the posts increases jumping space and helps reduce the risk of contact with the frame components. The net height is 185 cm, and the height of the trampoline from the ground to the mat is 89 cm, ensuring comfortable use and an appropriate level of safety.

More space to play and greater comfort

One of the distinctive features of the MERACH MR-2429B3 model is the specially contoured design of the posts supporting the safety net. Their curved shape increases the space inside the trampoline, allowing users to jump and move more freely. The greater distance between the safety net and the jumping area also enhances comfort during everyday play. This design ensures that the space for activity is utilized more effectively without having to increase the overall dimensions of the structure.

Safety Net for Greater Security

The trampoline is equipped with a tall safety net that surrounds the entire jumping area. This ensures that the user remains inside the play area even during more dynamic jumps. The trampoline's entrance features a two-way zipper and an additional safety buckle, which helps keep the net closed during use. This design enhances safety and allows users to focus on having fun without worrying about accidentally falling off the trampoline.

Dynamic bounce thanks to a large number of springs

The mat's optimal elasticity is provided by 80 springs, each 140 mm long. The large number of springs helps distribute the load evenly while jumping, resulting in a smoother and more comfortable bounce. The springs are coated with a layer of zinc, which helps protect them from corrosion and the effects of weather conditions. As a result, the trampoline can be used outdoors for a long time while retaining its performance characteristics.

Outdoor-Ready Construction

The MR-2429B3 model features powder-coated tubes that help protect the frame from moisture and daily wear and tear. Additionally, the spring cover is made of UV-resistant material, which helps minimize wear caused by sun exposure. The materials used are suitable for garden use throughout most of the season. As a result, the trampoline performs well both on sunny days and in changing weather conditions.
