Model: V12H002S26

Manufacturer: EPSON

EAN: 8715946448022

Product Code: 940740

R6,743

No more big black boxes

There's no need to let a big, black TV screen permanently dominate your space. By using a non-fixed screen and projector, you'll have the flexibility to view content on a big screen when you need it and hide it away when it's not in use.

Make the most of your projector

Don't settle for projecting on to a bare wall – with our screens you can enjoy the exceptional detail, vibrant colours, defined shadows and deep blacks that your projector provides.

Fuss-free assembly

Forget complicated instructions and lengthy installations, our screens are quick and easy to assemble. Just like our projectors, Epson screens are designed to get you up and running with minimal fuss. What's more, they're also easy to stow away.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Flexible positioning

Our versatile screens can be used in almost any room and can be easily adjusted so that you can get the best out of your projector.
