Maono E2 GEN2 sound card

The Maono E2 GEN2 is a versatile sound card designed for content creators - podcasters, streamers, musicians and audio editors. It allows the connection of two microphones simultaneously and provides independent 48V phantom power for each input. With a built-in 2000 mAh battery, it runs for up to 8 hours for complete mobility in and out of the home studio. Compatible with computers, smartphones, tablets and PS4/5 consoles, it lets you get started right away - just plug it into the device of your choice.

Dual microphone inputs with separate controls

The card offers two professional microphone circuits with up to 60 dB of gain - enough to work with most dynamic and condenser microphones. Each channel has separate volume and phantom power controls, giving you more control when recording interviews, guest podcasts or live broadcasts from two sources.

Intelligent noise reduction and clear sound

The Maono E2 GEN2 offers two-stage noise reduction, which filters out ambient sounds such as keyboard clatter and fan noise. This makes recordings clearer and the user's voice clearer - without the need for additional processing.

Rich set of audio features

There are control knobs for microphone volume, voice tone (pitch), effect level, as well as quick access to reverb presets and Auto-Tune functions. A panel with 8 audio buttons allows you to add your own effects or use preset ones, such as applause or laughter - useful during broadcasts or recordings.

Wide compatibility and easy operation

The Maono E2 GEN2 works with Windows, macOS, Android and iOS (adapter required for Apple devices under iPhone 15). It easily connects to platforms such as YouTube, Twitch, Zoom, TikTok and Spotify. The rear panel features USB-C, AUX IN, MONITOR SPK ports, streaming outputs, and microphone and instrument (Hi-Z) inputs, making it a true home studio center.

Included

- sound card
