

Flextail Evo SUP Pump Pro Portable SUP Pump (Gray)

Model: Evo SUP Pump pro

Manufacturer: FLEXTAIL

EAN: 6975755966717

Product Code: 943085

R4,408

Flextail Evo SUP Pump Pro Portable SUP Pump (Gray)

Meet the Flextail EVO SUP Pump Pro—an advanced, portable electric pump designed for water sports enthusiasts, travelers, and those with an active lifestyle. The device offers a maximum pressure of up to 45 PSI, an automatic two-stage pumping system, as many as 6 smart operating modes, inflation and deflation functions, a precise real-time pressure display, and automatic shut-off when the set value is reached. Thanks to its powerful 8000 mAh battery, it can operate wirelessly and also serve as an emergency power bank. This versatile solution for inflating SUP boards, car tires, mattresses, tents, water toys, and many other accessories will make preparing your gear a breeze.

Up to 62% faster than manual pumping

Forget about tiring manual pumping. The Flextail EVO SUP Pump Pro can inflate a SUP board from 0 to 15 PSI in about 9.5 minutes, which is up to 62% faster than traditional pumps. Thanks to its high performance, you can get ready to hit the water much faster—effortlessly and without getting tired before your adventure even begins.

Two-stage pumping system for maximum efficiency

The pump uses an intelligent two-stage system that optimizes speed and pressure. The first stage delivers an impressive flow rate of 360 L/min, quickly filling large volumes of air. When the pressure reaches approximately 0.8 PSI, the device automatically switches to the second stage, which generates 90 L/min, allowing you to precisely reach the target pressure. In practice, this means maximum speed without sacrificing precision.

6 smart modes - one device for multiple applications

The Flextail EVO SUP Pump Pro is equipped with 6 operating modes, allowing you to adjust the pumping parameters to specific equipment. Modes include, among others, car (2.5 bar / 36.3 PSI), motorcycle (2.4 bar), SUP board (15 PSI), air tent (7 PSI), mattress (5 kPa), and a countdown mode for quick deflation. Simply select the appropriate option, and the device will do the rest—no guesswork and no risk of over-inflation.

Precise real-time pressure measurement

The built-in digital display allows you to monitor pressure in real time while inflating. A sensor with 0.1 PSI accuracy guarantees extremely precise measurement, ensuring you always achieve the ideal parameters for your gear. Once the set value is reached, the pump automatically shuts off, protecting your gear from damage and giving you complete peace of mind.

One pump, 8 compatible nozzles

The device comes with 8 different nozzles, allowing you to inflate almost any equipment. You can easily inflate SUP boards, kayaks, inflatable boats, air mattresses, air tents, water toys, balls, car tires, motorcycles, and bicycles. One pump replaces several devices, saving space in your trunk and at home.

Powerful 8000 mAh battery - inflate wherever you are

The built-in 8000 mAh battery ensures full mobility. On a single charge, the device can inflate up to 6 SUP boards in a row, making it perfect for longer trips to the water. What's more, the pump also functions as an emergency power bank, allowing you to charge your phone, headphones, drone, or camera when you need it most.

Dual power supply - even greater freedom

The pump can operate on both the battery and a 12V car outlet, giving you complete flexibility. You can use it at the beach, by the lake, while camping, or right next to your car—whenever you need to quickly inflate your gear.

Active cooling for stable operation even in the heat

An advanced active cooling system allows the device to operate for long periods without overheating. The pump maintains high performance even at temperatures up to 113°F (about 45°C), making it ideal for hot days by the water or during intensive use.

Lightweight, compact, and travel-ready

The Flextail EVO SUP Pump Pro was designed with mobility in mind. Its compact design and ergonomic shape make the pump easy to carry and store. Additionally, a transport lock secures the device during travel, and a sand filter prevents particles from entering the mechanism—which is especially important when using it at the beach.

Quick deflation

The device also features a deflation function, allowing you to quickly deflate your SUP board, air mattress, or tent in just a few moments. The countdown mode lets you set the runtime, so your gear quickly returns to its compact size and is ready to pack away.

- Flextail EVO SUP Pump Pro electric pump
- 8 interchangeable nozzles for various valves
- Long air hose for inflating SUPs
- Hose with car valve
- 12V car adapter (cigarette lighter socket)
- USB-C charging cable
- User manual
- Carry bag

Manufacturer	Flextail
Model	Evo SUP Pump Pro
Maximum pressure	45 PSI
Maximum first-stage flow rate	360 L/min
Second-stage flow rate	90 L/min
SUP board inflation time (0-15 PSI)	approx. 9.5 min
Maximum number of SUP boards inflated on a single charge	up to 6
Pressure measurement accuracy	0.1 PSI
Battery capacity	8000 mAh
Power supply	battery-powered and 12 V from a car cigarette lighter socket
Display	digital with real-time pressure display
Operating modes	6 smart modes
Auto-off function	yes
Inflation and deflation function	yes
Operating temperature range	up to 113°F (approx. 45°C)
Cooling system	active motor cooling system
Pressure measurement units	PSI / BAR / KPA
Power bank function	yes
