Ultimea Poseidon D80 BOOM Soundbar

The Ultimea Poseidon D80 BOOM is a comprehensive audio system that takes home entertainment to the level of a cinema thanks to Dolby Atmos sound, advanced technology, and four speakers that create a realistic, multidimensional audio scene. Eight precisely tuned drivers and a subwoofer with BassMX technology deliver powerful, deep bass and full sound dynamics with powerful output. Control via the Ultimea app, Bluetooth 5.3 wireless connectivity, and a wide range of connectors make this a versatile and refined solution for those who demand the ultimate home theater experience.

Excellent sound quality

The Dolby Atmos 7.1 system uses advanced SurroundX audio algorithms that optimize the sound field based on signals from the left and right main channels. The result is a significantly expanded rear soundstage and spacious, immersive sound that fills the entire room and makes you feel like

you're in the center of the action. All this is complemented by 500 W peak power, which guarantees dynamic, energetic sound even in larger rooms.

Space and precise sound localization

The 360° Aural Spatial Localization technology is responsible for the realistic placement of sounds in space. Every effect, dialogue, and detail of the audio track is precisely located, resulting in an exceptionally immersive experience when watching movies, TV series, or concerts. This solution opens up a whole new level of surround sound.

Precisely tuned drivers

The soundbar is equipped with 8 carefully tuned drivers made of high molecular density materials. They ensure fast and precise responses to audio signals, which is crucial when playing sound at high sampling frequencies and high bit depths. This keeps the sound clear, detailed, and true to the original.

Powerful, deep bass

A subwoofer with BassMX technology is responsible for the low frequencies, offering up to 33% more bass compared to the Poseidon D80 model. The 16 mm excursion diaphragm generates deep, dynamic bass with high impact, while maintaining control and clarity. It's bass you can hear and feel – perfect for action movies and dynamic music.

Four surround speakers and app

The set includes 4 speakers that enhance the surround sound effect and complete the 7.1 configuration. They surround the listener with sound from all sides, creating a coherent and realistic audio scene, whether you're watching a movie, playing a game, or listening to music. You can adjust the sound to your preferences using the Utimea app. Intuitive controls allow you to shape the sound character and manage system settings conveniently—all from your smartphone.

Uncompromising image and audio

The soundbar supports 4K HDR Passthrough, ensuring the highest standard of home image reproduction. This means full compatibility with advanced video sources without any loss of image or sound quality. Thanks to X-Upmix technology, even content without native Dolby Atmos gains a rich, multi-channel character. One touch transforms non-Dolby audio into a full, immersive surround sound experience, regardless of the signal source.

Extensive connectivity

The Ultimea Poseidon D80 BOOM offers Bluetooth 5.3 wireless connectivity and a wide range of connectors, giving you complete freedom to configure your audio system. These include DC IN, FR, FL, AUX, OPTICAL, USB, HDMI IN, and HDMI eARC for TV. This flexibility allows you to easily adapt the soundbar to any home theater system.

Included

- subwoofer
- soundbar
- 4 surround speakers
- power supply
- subwoofer power cable
- front left speaker cable (3 m)
- front right speaker cable (3 m), rear left speaker cable (6 m), rear right speaker cable (6 m)
- HDMI cable
- Optical cable
- Remote control
- Wall mounting kit x12
- Wall brackets x6
- Speaker mounting screws x6
- User manual
- Manufacturer
- Ultimea
