

Flytec V030 Fishfinder 20,000 mAh Bait Boat

Model: V030-Finder

Manufacturer: FLYTEC

EAN: 5907085524917

Product Code: 947296

R6,617

Flytec V030 Fishfinder Bait Boat, 20,000 mAh (battery not included)

The V030 is an innovative bait boat that combines advanced GPS positioning technology with exceptional precision. The device allows you to program up to 180 waypoints, divided into 9 separate fishing zones. In each zone, you can set 20 individual positions, thereby creating a detailed map of the body of water. The automatic route control feature—Fixed Point Cruise Control—enables the boat to move smoothly between selected points, ensuring systematic and precise bait distribution according to a predetermined plan.

Spacious bait compartment with partitioning capability

Thanks to the Detachable Silo Partition system, the bait compartment can be easily divided into two independent sections. This allows for the simultaneous use of different types of bait, tailored to

specific fishing strategies and fish species. The compartment's maximum capacity is as much as 3 kilograms, making the V030 GPS ideal for longer fishing sessions without the need for frequent bait refills.

Professional wireless sonar with a color screen

The built-in fish finder provides precise data on underwater conditions. The high-resolution color screen displays information on fish size with an accuracy of one centimeter, water depth ranging from 0.6 to 36 meters (i.e., from 2 to 120 feet), real-time water temperature, and the bottom structure, which is mapped in detail. Additionally, the device features an alarm function that automatically alerts you to the presence of fish. The sonar operates within a radius of up to 100 meters from the receiver, and the intelligent Anti-Clutter system effectively eliminates interference and allows you to distinguish between fish based on their size.

Full control over the boat's movement

The V030 GPS is equipped with a Cruise Control feature that allows you to program a route and have the boat follow it automatically. You can adjust the speed and direction in automatic mode, as well as select specific points where the boat should stop. The system also allows you to return to the starting point with the press of a single button, which greatly simplifies operation even in challenging conditions.

Advanced LCD display with system diagnostics

The 4.3-inch LCD display integrated into the controller shows a range of important data. This includes the boat's current GPS position, battery levels for both the boat and the controller, the active fishing zone, and information from the fish finder. You can also monitor the status of all onboard systems on the screen, allowing you to keep a close eye on the device's operation.

Detection functionality with advanced parameters

The wireless sonar provides precise water temperature data accurate to one degree Celsius, determines water depth up to 36 meters, and maps the bottom structure in detail using color visualization. The detector is capable of detecting both individual fish and entire schools, and its

effectiveness is maintained even in waters with low visibility thanks to modern sonar technology.

Stable wireless communication and sleep mode

The communication range between the transducer and the display is up to 100 meters. Thanks to the Water Switch feature, the device automatically switches from sleep mode to active operation upon contact with water, which optimizes power consumption and extends battery life.

A comprehensive solution for the advanced angler

The V030 GPS is a professional tool for anyone who values full control, reliability, and precision while fishing. The combination of modern GPS navigation with a high-end sonar system makes this model a complete kit for locating fish and effective baiting. Every feature has been carefully refined to meet the expectations of the most demanding users.

Included

- Bait boat
- Remote control with LCD display
- Wireless sonar
- Charging cable
- User manual
- Carrying case

Manufacturer	Flytec
Model	V030 Basic
Color	Black
Material	ABS
Frequency	2.4 GHz
Range	up to 800 m

Battery (sold separately) 12V 20,000 mAh

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Operating time	2-4 hours
Charging time	approx. 12 hours
Weight	3,606 g
Dimensions	55 x 27.5 x 29 cm
Load Capacity	3 kg
