Doorbell 2S Kit

The Wireless 2S doorbell delivers high-quality images thanks to its 2K, or 3 megapixel resolution. This doorbell works on batteries and features a rotating lens with smart tracking function. Furthermore, the 2S features two-way conversation and fast response, so visitors can be answered anytime, anywhere. The battery of this video doorbell lasts up to 120 days under normal conditions. Moreover, the 2S IP is certified to withstand all weather conditions and the doorbell features infrared night vision. Recordings can be stored locally via an SD card; you can also opt for the optional Cloud service. Included in the 2S kit is a chime to ensure the bell is heard anywhere in the house, also the chime functions as a Wi-Fi extender.

2K rotating lens

The 2K lens offers great image quality to greet visitors and monitor the front of the house, even at night thanks to the night vision mode. The lens of the 2S can rotate up to 30 degrees and smartly track to keep a close eye on everything. The Imou 2S video doorbell uses 2.4GHz Wi-Fi and offers a fine stable connection when combined with the Chime, which is also a Wi-Fi extender.

Two-way talk and quick response

Listen and respond to visitors with the two-way call function. Which is also useful when delivering a parcel that can be left at the door. If necessary, there is the option of a voice converter to e.g. scare someone away. In addition, the 2S has a quick response function, making it possible to reply to visitors with pre-recorded messages. Thanks to its high-end motion sensor and smart AI algorithm, the 2S sends real-time notifications when a person is detected.

Up to 120 days of security on a single charge

This video doorbell features a rechargeable battery. Fully charged, the 5,000 mAh battery lasts up to 120 days under normal conditions. Battery performance depends on the number of times the camera is activated. Exceptionally high frequency comes at the expense of battery life.

Chime

The Imou DS2S gong is included in the package to ensure the ring of the bell is heard anywhere in the house. The DS2S gong also functions as a Wi-Fi extender to improve connectivity. The SD card slot for local recording is located in the chime. An SD card of up to 512GB can be used.

Installation

Download the Imou Life app (iOS, Android or Windows) and create an Imou account. After logging in, select the '+' sign at the top right of the Imou app to add a device. Scan the QR code on the doorbell and follow the steps in the app. Next, select the Wi-Fi network and make sure the device is close to the router during the installation process. The doorbell will be ready to use in no time! For recording images, you can choose the Imou Cloud service, as well as local storage using a Micro SD card.

Practical features Imou Life app

- Smart scenes: set smart scenes such as away mode where the camera is fully active
- Detection region: select in which zone the camera is active
- Customised security: Choose from several operational options including for power saving
- Multiple users: Share the device with multiple users so the whole household stays informed
