

GODOX V1Pro TTL Flash for Canon

Model: V1Pro C

Manufacturer: GODOX

EAN: 6952344222225

Product Code: 963790

R7,418

GODOX V1Pro C Flash

The GODOX V1Pro C flash for Canon is an advanced news flash designed for Canon cameras, equipped with a circular reflector, a detachable SU-1 flash module, TTL auto mode, HSS mode, and the Godox X 2.4 GHz wireless system. It offers 76Ws of power, a zoom range of 28-105 mm, power adjustment from 1/1 to 1/256, and a high-capacity battery that allows for at least 500 full flashes on a single charge. The maximum recharge time is just 1.5 seconds, and the ability to charge via USB-C or the included charger makes the flash convenient to use both in the studio and on location.

An additional flash module for greater control over the light

The GODOX V1Pro C is equipped with a detachable SU-1 flash module, which expands your lighting capabilities. It allows you to use both reflected light and soft fill light simultaneously, making it easier to achieve a natural effect and better illuminate shadows. This solution makes it easier to achieve soft light without having to set up additional modifiers or reflectors. When the module isn't needed,

you can easily detach it and use the flash in its standard configuration.

Intuitive operation and powerful performance

The flash was designed for convenient use in dynamic conditions, which is why it features a physical switch that allows you to instantly toggle between TTL and manual modes. This solution lets you quickly adjust settings without having to navigate through the camera or flash menus. The VB-30 battery can be charged using either the included VC26 charger or a universal USB-C port, providing greater flexibility when working outside the studio. For longer sessions, the flash is also compatible with the Godox Propac P960 external power supply, ensuring even longer runtime.

Circular Reflector, Natural Light, and Scene Shaping

The circular reflector ensures even light distribution and smooth tonal transitions, giving your photos a more natural look. A color temperature of 5600 K (± 200 K) provides light similar to daylight and ensures color consistency during photography. The magnetic accessory mounting system allows for quick attachment of compatible modifiers from the AK-R1 kit or the AK-R21 projection cap (sold separately). Additionally, the flash is equipped with an LED modeling light featuring 10-step brightness adjustment, which makes it easier to assess the lighting effect before taking a photo and aids in focusing in low light.

Wireless Communication and Extensive Configuration Options

The built-in Godox X 2.4 GHz radio system allows the flash to function as both a transmitter and a receiver, enabling convenient wireless control of compatible flash units. Support for 5 groups and 32 channels makes it easy to set up complex lighting rigs, while HSS and Multi-strobe functions expand your creative possibilities. The swivel head, adjustable from -7° to $+120^\circ$ vertically and 330° horizontally, makes it easy to bounce light off walls and ceilings, allowing you to achieve a more natural lighting effect. The kit includes all the essential accessories needed to get started with the flash.
