GODOX X2T-F Trigger for Fuji

The Godox X2T-F is a wireless transmitter designed for Fuji cameras that provides full control over compatible flash units. It supports TTL automatic flash metering, as well as manual (M) and stroboscopic (Multi) modes, making it ideal for both fast-paced shoots and more demanding lighting setups. With 2.4 GHz connectivity, a range of up to 100 meters, and support for 5 groups and 32 channels, you can conveniently control multiple flashes even in complex lighting setups.

Advanced Flash Control Capabilities

The transmitter allows you to use flash exposure compensation and manually adjust flash output, enabling you to precisely tailor the lighting to the conditions and your intended effect. It also supports synchronization with very short HSS exposure times and first- and second-curtain flash, providing greater flexibility when photographing dynamic scenes and working with various camera settings.

Controlling Flashes from a Smartphone

The built-in Bluetooth module allows you to connect the transmitter to a smartphone and control compatible flashes using the Godox app, available for Android and Apple devices. Select smartphone models also allow you to trigger the strobes when taking a photo, which increases convenience and offers additional options for remote lighting control.

Intuitive operation and compact design

The Godox X2T-F is equipped with an LCD display that makes it easy to check settings and quickly manage operating parameters. With compact dimensions of 7 × 7 × 5.8 cm and a weight of just 0.07 kg, the transmitter takes up very little space and is easy to carry. The device is powered by two AA (R6) batteries, which must be purchased separately.

Included

- Godox X2T Transmitter
- Packaging

Manufacturer	Godox
Model	X2T-F
Compatibility	Fuji Cameras
Function	Transmitter
Supported flash modes	TTL, M, Multi
HSS synchronization	Yes
First- and second-curtain synchronization	Yes
Wireless connectivity	2.4 GHz
Bluetooth	Yes
Groups/Channels	5/32
Range	Up to 100 m
