GODOX UB-165W Parabolic Reflective Umbrella

The GODOX UB-165W Parabolic Reflective Umbrella is a white photography umbrella with a diameter of 165 cm, designed to evenly diffuse and soften light. It works well with flash units, continuous light, incandescent bulbs, and photographic fluorescent lights. Thanks to its large surface area, it effectively reduces harsh shadows and allows for more natural lighting during portrait, product, fashion, and many other types of photo shoots.

Even and Soft Light

The white surface of the umbrella effectively diffuses light, making the lighting softer and more even. This helps reduce strong contrasts and achieve a more natural look for the people and objects being photographed. This is a practical solution for both studio work and mobile photography setups.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. Parabolic Design for Multiple Applications

The GODOX UB-165W features a parabolic design that helps you better control the direction of light dispersion. Its large diameter of 165 cm allows for illuminating a larger area, making the umbrella ideal for portrait, advertising, product, and fashion photography. It can be used with various light sources, which increases its versatility.
