

GODOX V860III TTL Flash for Nikon

Model: V860IIIN KIT

Manufacturer: GODOX

EAN: 6952344221136

Product Code: 963845

R5,681

GODOX V860IIIN Nikon Flash

The GODOX V860III N flash is a modern photojournalism flash designed for Nikon cameras. The model features automatic TTL metering, manual mode, and Multi-stroboscopic flash, making it ideal for photojournalism, portrait, and event photography. Guide number 60 (ISO 100, 200 mm), HSS synchronization up to 1/8000 s, a 20–200 mm zoom range, and the built-in Godox X 2.4G wireless system provide great flexibility for working in various lighting conditions. A high-capacity lithium-ion battery allows for up to 480 full-power flashes, and the recharge time is a maximum of 1.5 seconds, enabling you to work without unnecessary downtime.

Modeling light and quick mode switching

The GODOX V860IIIN is equipped with a modeling light featuring 10-step power adjustment, which makes it easier to assess the lighting effect before taking a photo. This makes it easier to choose the right direction and intensity of light, reducing the number of test shots. The manufacturer has also

included a practical switch that allows for instant switching between TTL and manual modes. This solution enables you to react more quickly to changing shooting conditions and enhances your workflow during dynamic photo sessions.

High-Capacity Battery for Long Sessions

The flash uses a high-capacity lithium-ion battery that allows for up to 480 full-power flashes on a single charge. The maximum recharge time is just 1.5 seconds, so the flash is quickly ready for the next shot. This is especially useful during photojournalism, weddings, or events where continuity is key. Fewer breaks for recharging mean greater convenience and the ability to focus on taking photos.

Flexible Light Control

The flash head offers automatic and manual zoom ranging from 20 to 200 mm, allowing for precise adjustment of the light beam to match the lens's focal length. Additionally, it rotates horizontally from 0° to 330° and tilts vertically from -7° to 120°, making it easier to use bounce flash. Such a wide range of adjustment allows you to work freely both in small rooms and when shooting in larger spaces. The result is greater control over the lighting and a more natural look to your photos.

Advanced features for creative photographers

The V860IIIN supports TTL, Manual, and Multi modes, offering extensive options for adapting the flash to specific situations. HSS synchronization up to 1/8000 of a second allows for the use of fast shutter speeds even in bright daylight. Users also have access to FEC, FEB, second-curtain sync, and S1 and S2 modes. As a result, the flash is well-suited for both everyday assignments and more creative photo shoots.

Godox X 2.4G wireless system

The built-in Godox X 2.4G system enables wireless communication with other Godox strobes and triggers, ensuring a stable connection during operation. The model is compatible with the X1, X2, and XPro triggers and can function as either a Master or Slave unit. This solution makes it easy to set up complex lighting rigs without the need for additional cables. An additional convenience is the

quick-release hot shoe lock in the form of a convenient lever, which allows you to efficiently attach and detach the flash from the camera.

Included in the set

- GODOX V860IIIN flash
- Lithium-ion battery
- Charger
- USB cable
- Protective case
- Manufacturer’s packaging

Manufacturer	GODOX
Model	V860III
Compatible Cameras	Nikon
Guide Number	60 (ISO 100, 200 mm)
Color Temperature	5600 K ±200 K
Operating Modes	TTL / Manual / Multi / S1 / S2 / Master / Slave
HSS synchronization	up to 1/8000 s
Flash duration	1/300 - 1/20000 s
Zoom	20-200 mm (automatic and manual)
Recycle time	max. 1.5 s
Number of full-power flashes	up to 480
Triggering:	hot shoe, test button, Godox X 2.4G system
Groups/Channels	5/32
Display	LCD
Dimensions	195 × 75 × 59 mm
Weight	530 g
