

# ULTENIC U18 PRO Cordless Upright Vacuum Cleaner

Model: 8804430502

Manufacturer: ULTENIC

EAN: 6924843223409

Product Code: 963857

## R3,884

### ULTENIC U18 PRO Cordless Upright Vacuum Cleaner

The ULTENIC U18 PRO is a cordless upright vacuum cleaner designed for thorough and convenient cleaning. The device is equipped with a 600 W motor that generates 55 kPa of suction power, as well as a high-performance battery providing up to 80 minutes of runtime in FLOOR mode. The model features a six-stage filtration system with a HEPA filter, a smart LED display, Green Eye brush illumination, a freestanding design, a collapsible wand, and a docking station with a charging function. Thanks to its low noise level of just 62 dB, the vacuum cleaner is ideal for both everyday cleaning and more demanding cleaning tasks.

### High Power and Effective Dirt Removal

At the heart of the device is a modern 600 W motor that delivers 55 kPa of suction power. These specifications allow it to effectively remove dust, pet hair, sand, crumbs, and other debris from laminate floors, tiles, carpets, and rugs. Its high performance ensures the vacuum cleaner thoroughly cleans surfaces on the very first pass, reducing the time needed for cleaning.

## **Long runtime and three vacuuming modes**

The ULTENIC U18 PRO is equipped with a high-capacity lithium-ion battery that provides a long runtime tailored to the selected operating mode. In FLOOR mode, the device can run for up to 80 minutes; in CARPET mode, up to 45 minutes; and in TURBO mode, up to 25 minutes. This feature allows you to adjust the suction power to the type of surface while effectively managing energy consumption.

## **Quiet operation without disrupting daily activities**

An advanced vibration damping system and an optimized motor design limit noise levels to approximately 62 dB. As a result, the device operates much more quietly than many traditional vacuums, ensuring greater comfort during use. Its quiet operation allows you to clean at any time of day without worrying about disturbing your household members.

## **Smart LED display and full control over the device's operation**

The modern LED screen allows you to conveniently monitor all the vacuum cleaner's key operating parameters. You can check the battery charge level, the currently selected mode (FLOOR, CARPET, or TURBO), and information regarding necessary maintenance. The display also alerts you to any brush jams, allowing you to quickly restore the appliance's full performance.

## **Advanced, six-stage filtration system**

The ULTENIC U18 PRO uses a comprehensive filtration system that effectively traps fine dust, pollen, and allergens. The entire process involves six stages of air purification: centrifugal separation, a stainless steel filter, multi-cyclone filtration, a foam pre-motor filter, a HEPA filter, and an exhaust foam filter. This solution captures up to 99.99% of contaminants, ensuring that cleaner air is released into the environment.

## **Green Eye LED lighting and a brush designed for pet owners**

Green Eye technology uses green LED lighting with a range of approximately 45 cm, making fine dust and small particles more visible even on hard floors. This feature makes it easier to reach areas along baseboards, under furniture, and in corners. The brush, featuring a V-shaped roller, minimizes tangling of hair and pet fur, and its special design reduces the risk of the mechanism jamming.

## **Collapsible Tube and Convenient Storage**

The ULTENIC U18 PRO is equipped with an ergonomic tube that can be bent at a 180° angle, significantly increasing the comfort of daily cleaning. This design allows you to effortlessly reach hard-to-reach areas under beds, cabinets, dressers, and sofas without having to bend over or kneel. As a result, the vacuum cleaner's nozzle can be slid under furniture to a depth of approximately 65 cm, while maintaining full freedom of movement. Another great convenience is the self-standing design, which allows the device to remain upright both during use and when stored.

## **Easy Maintenance and Convenient Operation**

The manufacturer has ensured that cleaning the individual components is quick and intuitive. The dust bin can be emptied with the push of a button, and the HEPA filter and other components are washable under running water. This design helps maintain the device's high performance over the long term and reduces operating costs.

## **Included in the set**

- ULTENIC U18 PRO main unit
- Electric floor brush
- Battery
- Wide upholstery nozzle
- Crevice tool
- 2-in-1 brush
- Collapsible tube
- HEPA filters x 2
- Wall-mounted docking station
