ULTENIC U20 Cordless Upright Vacuum Cleaner with Mopping Function

The ULTENIC U20 is a cordless upright vacuum cleaner equipped with vacuuming and mopping functions, a flexible Flex Wand hose, a TangleGuard™ brush that prevents hair from getting tangled, and a seven-stage HEPA filtration system. The device is designed to thoroughly remove dust, pet hair, crumbs, and other everyday dirt from hard floors and carpets. The set includes, among other things, a floor brush, a 230-ml water tank, a crevice tool, a 2-in-1 tool, replacement HEPA filters, a convenient wall mount for storing the vacuum and accessories, and a separate AC adapter for charging the battery.

Vacuuming and mopping in one step

The ULTENIC U20 uses the HydroTank™ system, which allows you to vacuum and wipe the floor with a damp mop at the same time. Thanks to the detachable 230-ml water tank, you can tackle daily chores more quickly and reduce the number of steps involved in cleaning. This solution is particularly effective in homes with children and pets, as it effectively removes dust, pet hair, crumbs, and stains left on the floor.

TangleGuard™ brush to reduce hair tangling

The manufacturer has incorporated a special brush design featuring silicone elements, soft bristles, and a comb-like structure that prevents hair from tangling. This design improves vacuuming performance and reduces the frequency of manual cleaning of the roller. As a result, the device effectively handles both fine dust and larger debris left behind by pets.

Flex Wand for Easier Cleaning

The flexible Flex Wand allows you to reach areas under beds, sofas, and cabinets without having to bend over. The design provides a reach of up to 65 cm under furniture, which means you can reach even deeper than with standard solutions of this type. In practice, this translates to greater comfort while cleaning and more thorough dust removal from hard-to-reach spaces.

Green LED lighting to detect fine debris

The floor brush is equipped with wide-angle green LED lighting with a 120° beam angle. The light illuminates an area up to 1.5 meters in front of the device, making it easier to spot dust particles, pet hair, and human hair. This feature improves cleaning effectiveness, especially under furniture and in areas with limited light.

Additional lighting in the main unit

The ULTENIC U20 is also equipped with a green LED located directly in the main unit. After detaching the tube and attaching the crevice tool, the light helps you clean more thoroughly between furniture, inside cabinets, and other hard-to-reach areas. This makes it easier for the user to spot dirt even in very dark corners.

Hygienic Emptying of the Dust Bin

One of the most interesting features of the vacuum cleaner is the Hands-Free Bin Scraping system, a mechanism that allows you to clean the dust bin without coming into direct contact with dirt. A special slider activates an internal scraper that helps remove accumulated dust, pet dander, and hair that have settled on the filter. This solution enhances user convenience and reduces the need for manual cleaning of individual components.

Seven-Stage HEPA Filtration

The advanced filtration system effectively captures up to 99.99% of particles as small as 0.3 microns. The use of seven filter layers helps reduce the amount of pollen, dust, and other airborne contaminants. This is particularly important for allergy sufferers, pet owners, and anyone who wants to maintain a clean environment.

Smart Display and Intuitive Operation

The easy-to-read LED display provides quick access to key information about the device's operation. Users can check the battery charge level, remaining runtime, selected operating mode, and notifications regarding the need to replace the filter or if a blockage has been detected. The power switch, located directly on the handle, allows for convenient one-handed operation of the vacuum cleaner.

Sturdy design and convenient storage

The vacuum cleaner's design allows it to be stood upright, enabling you to pause cleaning temporarily without having to lean the unit against a wall. The set includes a wall mount designed for storing the vacuum cleaner and accessories, ensuring that all components remain organized and are always within reach. Charging is done using the included AC adapter, which connects directly to the battery or the unit.

Included in the set

- ULTENIC U20 main unit
