ULTENIC U20 Cordless Upright Vacuum Cleaner

The ULTENIC U20 is a cordless upright vacuum cleaner equipped with a 600-watt motor, 55,000 Pa of suction power, a spacious 1.5-liter dust bin, a 7-stage filtration system with a HEPA filter, an LED display, and a high-performance battery providing up to 60 minutes of runtime. The Flexible Wand allows you to reach up to 65 cm under furniture, and GreenEye technology makes it easy to spot fine dust. The device can clean an area of up to 200 m² and operates at a noise level of approximately 60 dB.

Up to 60 minutes of runtime and cleaning of areas up to 200 m²

The ULTENIC U20 is equipped with a high-capacity battery that provides up to 60 minutes of runtime on a single charge. With such a long runtime, the device can clean an area of up to 200 m² without having to stop and recharge the battery. Depending on the selected mode, the vacuum cleaner can operate for 55 to 60 minutes in hard-floor mode, 35 to 40 minutes when cleaning carpets, and 15 to

20 minutes in Turbo mode.

A spacious 1.5-liter dust bin

The 1.5-liter dustbin used in the U20 model can hold up to three times as much dust, pet hair, and other debris as standard 0.5-liter containers. The larger capacity means you'll need to empty the dustbin less often, which enhances user comfort and saves time. This feature is particularly useful in homes with children and pets.

Flexible wand for easy access under furniture

The Flexible Wand system is designed to effectively remove dirt from under beds, sofas, and cabinets. The bendable hose provides a reach of up to 65 cm deep under furniture—10 cm more than many standard designs. This means the user doesn't have to bend over or move furniture to thoroughly vacuum hard-to-reach areas.

Advanced Filtration and Cleaner Air

The vacuum cleaner uses a 7-stage filtration system that separates dust, hair, and fine particles from the airflow. The HEPA filter captures particles as small as 0.3 microns, reducing the amount of pollen and allergens circulating in the room. The multi-stage filtration system also helps maintain the appliance's high performance over the long term.

Quiet Operation and Intuitive Control

With a noise level of approximately 60 dB, the vacuum cleaner can be used both in the morning and in the evening without causing undue discomfort to household members. The One Touch button lets you start the vacuum with a single press, without having to hold down the trigger continuously. The easy-to-read display shows key information about runtime, battery level, the selected mode, and the device's status.

GreenEye technology and a brush that reduces hair tangling

The GreenEye backlight helps you spot dirt that remains invisible in dimly lit areas. This makes it easier to remove dust that accumulates under furniture, along baseboards, and in the corners of rooms. The TangleTame brush is designed to minimize hair and pet hair tangles, making the device easier to maintain.

600 W power and 55,000 Pa suction power

The ULTENIC U20 is equipped with a 600 W motor that generates 55,000 Pa of suction power. These specifications allow for the effective removal of dust, pet hair, crumbs, and other debris from both hard floors and carpets. Users have three operating modes at their disposal—Floor, Carpet, and Turbo—allowing them to adjust the vacuum's performance to the type of surface being cleaned.

Freestanding Design and Convenient Storage

The ULTENIC U20 features a freestanding design, allowing it to remain upright without needing to be leaned against a wall. This design makes it easy to pause cleaning and resume at any time. Its compact design and the ability to use various attachments make the device easily adaptable to many everyday uses.

Included in the set

- ULTENIC U20 vacuum cleaner
- Electric floor brush
- Flexible hose
- Crevice tool
- Brush attachment
- Spare filter
- Battery
- Wall mount
- Charger
- Brush cleaning tool
- User manual
