R3,902

Petlibro Granary food dispenser with camera with double bowl, 5L (black)

Petlibro Granary is an advanced food dispenser with camera that allows you to feed and watch your pet remotely - even at night. The 5L reservoir for dry food ensures fresh food for longer, and the sealed design protects food from moisture. The built-in camera with 145° viewing angle and motion detection allows real-time recording and viewing, as well as saving footage to a MicroSD card or the cloud. With the meal splitter, you gain control over the amount of food in each of the two bowls. The device supports 2.4GHz and 5GHz Wi-Fi connection, offers two-way calling and the ability to share access with other household members. Take care of your beloved pet's daily routine - wherever you are.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. Take care of your pet - even when you are away

Petlibro Granary with camera and double bowl is more than a simple food dispenser - it's an advanced device that allows you to feed your pet with precision, and keep an eye on him at all times. With an impressive capacity of 5 liters, it ensures regular and fresh meals, while the downward-facing camera guarantees a full view of your pet without unnecessarily revealing the inside of your home. The built-in microphone and speaker allow two-way communication. You can call your pet remotely and even record a 10-second meal call to encourage your pet to approach the bowl.

Equal food distribution

A unique, adjustable meal divider takes care of equitable portions whether you have one or two pets. The far-right setting ensures even dispensing to both bowls, while the middle setting allows you to deliver more food to one of them. The mechanism works efficiently and precisely, eliminating the risk of uneven distribution.

Clear images day and night

The built-in camera with a 145° viewing angle and night mode will capture every detail, even when your cat sneaks into the bowl at three in the morning. Thanks to smart content filtering, the device automatically identifies pet activities and discards irrelevant footage, and you gain access to the really important moments. It's the perfect way to deepen the bond with your cat or dog.

Full control from anywhere

The dispenser supports both 2.4 GHz (wider range) and 5 GHz (faster transmission) bands, which guarantees a stable connection to the Petlibro app. You can receive motion and sound alerts, adjust the sensitivity of the alerts, and choose from three camera viewing ranges. Save video locally on a MicroSD card or in the cloud - whatever is more convenient for you!

Invite your family to care together

Petlibro Granary allows up to five users to share the device. Each of them can remotely feed your pet, view it through the camera and turn on the voice - all under your supervision, of course.

Freshness for longer

Four structural elements are responsible for the tightness and protection of the food, which effectively insulate the inside of the container. This keeps the food fresh, dry and tasty - even with daily use.

Included

- food dispenser
- food distributor
- double bowl with handle
- power supply
- bag with desiccant
- instruction manual
