Manufacturer: RIVACASE

EAN: 4260709010472

Product Code: 985784

R1,789

HIGH-QUALITY WATER-REPELLENT FABRIC

These days you do not want to be taking any risks with your personal belongings and the contents of your bag. We all carry with us multiple items that remain susceptible to water damage. This is the kind of damage that can not only ruin your day but potentially your month or year so it is crucial that you take the necessary precautions. That is why with this Erebus collection you are provided with a high-quality water repellent fabric that will keep the water out and the things on the inside dry and safe.

COMPACT BUT CAPACIOUS

This backpack walks the very carefully considered line between space and practicality. It is not so large that it becomes a hugely cumbersome bag that you feel you have to lug about with you and which seems to always have extra unnecessary space. But it is also not such a small bag that you

constantly feel like you are having to stuff in that extra item just to make sure you have everything you need. It is both compact making it easy to get about the place but it is also capacious enough that you can carry with you everything you need.

FRONT ZIPPERED COMPARTMENT WITH AN ORGANIZER PANEL

The very roomy compartment for documents and accessories found inside the backpack also features an organizer panel so that you can know where all of your important often-used items like your wallet, phone or notepad is at all times of the day and are not left frustrated or embarrassed while having to scrabble in the bottom of your bag looking for them. And it also features a detachable key strap so that you know where that all-important set of house keys is so that you can get in the door and put up your feet as soon as possible.

TWO SIDE POCKETS

There are not one but two side pockets on this bag because we know that there are certain items that are necessary for you to carry with you but which you might not necessarily wish to take with you on the inside of your bag. One of these is an umbrella which after use will obviously be covered in moisture, and the other is a water bottle which obviously always runs the risk of not being fastened correctly leading to potentially disastrous consequences. But these two side pockets enable you to get round both issues and take these crucial items with you on your journey.

FRONT ZIPPERED POCKET FOR ACCESSORIES

A front zippered pocket for accessories is included in this Erebus backpack so that you can slip away things like a charger or small book and not have to go through the process of opening up and closing the main compartment every time you need to put something away when getting in or out of a train for instance. This kind of feature helps you to better organize your belongings then but also means that you will not be delayed in your day but can continue unhindered and use your time most effectively.

HIDDEN ZIPPERED POCKET ON THE BACK

There is a hidden zippered pocket on the back of this Erebus backpack should you need to keep things in more heightened security. There are some things, like a passport say, that we want to be able to get out fairly quickly when we are at the check-in desk or going through security but which we also want to be kept in ultra-secure conditions. That is where this hidden pocket comes into its

own offering you a place where you can slip it away with ease and remain secure in mind that it is in as safe conditions as it is possible to be.

COMFORTABLE CARRYING

Comfortable shoulder straps with softened bands provide you with the perfect kinds of straps for easing your mind on your journey ahead. You do not have to worry about thin straps digging into your back and shoulders causing you discomfort and potentially long-term health damage if you are using heaving loads. Also, a padded back panel prevents corners of sharper possessions from digging into you. A soft carrying handle and a loop for hanging will give you the opportunity to stow away your bag and keep your house nice and tidy.

STRAP MANAGEMENT SYSTEM

This bag comes with its own strap management system that prevents excess strap material from dangling. This is really important if you are say moving at speed on a bike as your straps can become caught or tangled in a tree branch and lead to serious injury. Similarly, you can get them caught in train or elevator doors. But you also want to have your straps tied up neatly because it keeps you compact and makes you look more professional and put together for both your professional and social lives.
