BATTLECRUISER II

ENHANCED FOR THE ULTIMATE GAMER

BATTLECRUISER II exemplifies XPG's balance of aesthetics and performance. Its :Exoskeleton design combines futuristic style with optimized functionality, ensuring stability, durability, efficient airflow, and a high level of aesthetic value.

Easy Building, Easy Cleaning

Installation and maintenance are a breeze thanks to the magnetic front panel. The side and upper panels can also be assembled with ease, requiring no additional tools.

Unleash the Power of Synchronized Lighting Effects

BATTLECRUISER II features XPG PRIME BOX, enabling synchronized lighting effects across multiple devices and customization through XPG PRIME ecosystem management software. Create stunning lighting effects that match your mood, or sync with in-game events to make your gaming

environment more immersive.

Optimized Airflow and Xtreme Cooling Efficiency

Enjoy the exceptional cooling features of BATTLECRUISER II, which boasts a high-airflow layout, four 120mm ARGB fans, and support for up to a 420mm radiator at the front of the chassis.

Enhanced Compatibility for Advanced Cooling Solutions

BATTLECRUISER II's increased height allows for a great deal of installation compatibility, including space for a 420mm front radiator. This accommodates advanced liquid cooling systems, allowing users to ensure peak performance from their systems during intense gaming sessions.

Flexible Storage Options

BATTLECRUISER II is designed for various configurations to meet different storage needs .

Strong, Adaptable Graphics Card Holder with Bottom Magnet

With an adjustable height ranging from 52-134mm and the strength to support even the heaviest of current-gen graphics cards, the included toolless installation GPU Holder delivers an adaptable building experience that's suitable for any standard DIY PC configuration.

Easily Hide Cable Mismanagement

BATTLECRUISER II is equipped with a rear Cable Management Hub and PSU Cover, allowing users to hide aesthetically unpleasing cable management practices. The underside of the case hides all connectors for a sleek, clean appearance.

Efficient I/O Panel Design

BATTLECRUISER II's I/O panel delivers a simple but effective combination of useful ports and buttons for a clean, modern look.
