## R1,345

- Accommodates up to 3 different power tips
- SecureFix clips for semi-permanent bonding to the DC cable
- Electrical failsafe mechanism

The Targus 3-Way Active DC Charging Cable is an accessory to the Targus family of docking stations. This part accommodates up to 3 power tips to make transition easy for organisations that may operate up to 3 different brands of laptops. It comes with SecureFix clips that will bond neatly to the cable. This model introduces an improvement: A smart feature that will only allow 1 laptop/device to be charged at a time and incorporates electrical failsafe feature to protect your laptop.

We are currently transitioning our universal power tip system in preparation for upcoming new USB-C products. If you have an existing fleet of Targus products, we can help you transition to the new
