Active Noise Cancellation along with Ambient Awareness

HA-EC75T strikes the right balance between immersive sound and outdoor awareness.

Switch between Noise Cancellation for full focus and Ambient Sound Mode to stay aware—with a simple tap. These earphones are designed for those who want both peace of mind and an elevated audio experience.

Ready for workouts or rain --- IP57 Protection has you covered

Rain or shine, your music never stops. IP57 certification ensures your earphones are ready for any environment, offering robust protection against dust and water immersion. From powering through a workout to showering afterward—or even tackling a dusty trail or getting caught in unexpected rain—this feature guarantees reliable performance and peace of mind.

Durability and up to 40 hours Long Battery Life

Long days? No problem. With up to 11 hours of playtime on the earphones and an additional 29 hours with the charging case, the HA-EC75T keep up with your longest workouts and outdoor adventures. Whether you're running a marathon, hitting the gym, or enjoying a long hike, stay focused, and keep moving forward—without worrying about recharging.

Uncompromising in both sports performance and sound quality

Immerse yourself in energetic sound while enjoying crystal-clear calls, thanks to AAC codec support and JVC's commitment to refined sound quality. Choose from three preset sound modes, each tuned for different listening preferences and environments, enhancing your music experience during physical activities.

Effortless Control, Stress-free Low latency mode

Experience the blend of convenience and performance. The touch sensor allow for seamless controls with a simple tap right at your fingertips. The low latency mode ensures a lag-free experience, making them ideal for watching training videos or fitness gaming.
