Manufacturer: LIENE

EAN: 6971398602234

Product Code: 997794

R3,582

Liene Amber M110 4x6" 10-Sheet Photo Printer

The Liene Amber M110 4x6" is a compact photo printer that uses dye-sublimation technology, allowing you to print photos in 10 × 15 cm (4 × 6") and 7.7 × 7.7 cm (3 × 3") square stickers. It connects wirelessly via Bluetooth to Android and iOS devices, as well as computers. The dedicated Liene Photo app lets you print photos, create collages, use filters, frames, and ready-made templates, and prepare photos for documents. The entire printing process takes just 59 seconds from the moment you send a photo from the app, and the kit includes 10 sheets of photo paper, 10 sheets of sticker paper, a paper cassette, an ink ribbon cartridge, and a power adapter, so the device is ready to use almost immediately after unboxing.

Photos and Stickers in One Device

The Liene Amber M110 lets you print both classic 10 × 15 cm photos and square 7.7 × 7.7 cm stickers. The stickers are printed on a special 10 × 15 cm sheet, which features a marked area for peeling off or cutting out a square sticker. This makes the device ideal for creating photo albums as well as decorating planners, journals, greeting cards, and DIY projects.

Dye-sublimation printing with a protective layer

The printer uses dye-sublimation technology, in which the image is created by sequentially applying layers of Cyan, Magenta, and Yellow dyes. The final step in the process is the automatic application of a clear protective layer that shields the photo from moisture, fingerprints, and oxidation. This ensures that photos retain their vibrant colors and attractive appearance for a long time.

A finished photo in 59 seconds

The Liene Amber M110 was designed with fast printing in mind. The entire printing process takes about 59 seconds from the moment the photo is sent from the app, so you don't have to wait long for the finished print. This is a practical solution during family gatherings, parties, or trips, when photos can be printed almost immediately after they're taken.

Wireless printing from multiple devices

Bluetooth connectivity allows for convenient cable-free printing. The printer can be used by users of Android and iOS smartphones, as well as computers. Intuitive device pairing makes transferring photos quick and easy.

The Liene Photo App—More Editing Options

The dedicated Liene Photo app offers a range of features to help you prepare your photos for printing. In addition to standard printing, you can use filters, frames, templates, collages, and posters, as well as prepare photos for official documents (ID photos). This makes the app ideal for both creating keepsakes and taking photos for ID cards or other documents.

Practical Design
