The Govee H600D GU10 Wi-Fi & BLE RGBWW Bulb is a set of two bulbs that offer incredible possibilities for personalising your lighting. With in-app control features and compatibility with voice assistants such as Alexa and Google Assistant, these bulbs give you complete control over the light in your home - from mood lighting to bright light for work.

Integrated Wi-Fi and Bluetooth connectivity allows you to bulb control via the Govee app, available on Android and iOS. Plus, with support for Alexa and Google Assistant, you can control the lighting with your voice. Change colours, set schedules or adjust light intensity without having to get up from your seat.

The Govee H600D bulbs offer a music mode that synchronises lighting with ambient sounds. Ideal for parties or a relaxing evening with your favourite music - the light automatically responds to the rhythm, creating dynamic lighting effects that perfectly complement the atmosphere.

Govee H600D bulbs offer a wide choice of colours, allowing you to choose from 16 million colours.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice.
