

**Goodram IRDM
RGB DDR5 IRG-
60D5L30S/32GDC
memory module
32 GB 2 x 16 GB
288-pin DIMM**

Model: IRG-60D5L30S/32GDC

Manufacturer: GOODRAM

EAN: 5908267965184

Product Code: 998467

R11,282

Outstanding performance

Use the power of the latest platforms with the potential of IRDM RGB DDR5 modules. Reach for more in games, stream in ultra-quality and work easily like never before. Module speeds of up to 6800 MHz ensure stability and unprecedented user performance. Whether you're a gamer, enthusiast or professional - play and work as you like with IRDM RGB DDR5 RAM.

A perfect match

In addition to outstanding design, IRDM memories guarantee great performance. Based on carefully selected components and memory chips, IRDM RGB DDR5 modules offer speeds of up to 6800 MHz at CL34. Choose from a wide range, deciding on the ideal

solution. The memory modules are offered in 2 x 16 GB and 2 x 32 GB kits and with frequencies of 5600, 6000, 6400 and 6800 MHz. Decide and push the limits of virtual gaming to the next level.

Lighting under control

A distinctive feature of the IRDM RGB memory is the matte LED backlight strip. The use of 8 addressable diodes guarantees beautiful and smooth transitions of the illumination modes along the entire length of the module. The latest IRDM DRAMs are compatible with lighting control software from leading motherboard manufacturers (ASUS, MSI, GIGABYTE and AsRock), guaranteeing impressive visual effects. ARGB LED backlighting will perfectly enhance the look of any PC - just the way you like it, every day.

Durable heatsink

The latest IRDM memories are stylistically reminiscent of the earlier generation, underlining the brand's commitment to aesthetic. The black, solid, milled heatsink gives a feeling of high quality workmanship. It is made of aluminium, which conducts heat perfectly. This ensures adequate cooling and performance, essential for stable operation of the entire kit during long games or in demanding applications.

OC profiles

IRDM RGB DDR5 modules are compatible with the Intel XMP profile. Depending on your tasks or the level of gameplay, set the modules as you wish. With a single click, activate lower latency, faster speeds and appropriate voltages for unrivalled performance.
